Subject: Product Recall - Major Pharmaceuticals
Date: Friday, September 09, 2016 4:46:47 PM

Major Pharmaceuticals is recalling to the pharmacy level the two products indicated below. The recall was initiated due to complaints received which raised concerns that product sterility was potentially impacted. Use of a contaminated product could be calamitous for any population since there is a reasonable probability of a potentially sight threatening eye infection. The product was first shipped December 14, 2015.
Please immediately check your inventory, quarantine, discontinue distribution of the affected product, and contact your wholesaler for directions.
