Subject: Recall notice - Genzyme Corporation

Genzyme Corporation is initiating a recall of one lot of Mozobil (plerixafor injection) 24mg/1.2mL. Genzyme has received one customer complaint to date for a label defect for Mozobil lot 5RZ002. Genzyme's initial investigation points toward a vendor label production issue that caused a leeching of the ink into the surrounding label, resulting in a faded and potentially unreadable lot number and expiration date on the vials.

Please immediately check your inventory, quarantine, discontinue distribution of the affected product, and contact your wholesaler for directions.

Product Description	Lot#	Expiration Date	Distribution Dates
Mozobil (plerixafor injection) 24mg/1.2mL	5RZ002	2018-04	Dec 2015 to 22-Jul-2016
