Subject: Updated Recall Notice - Key Compounding Pharmacy

Key Compounding Pharmacy is issuing a recall of unexpired compounded sterile preparations due to lack of sufficient indications of sterility assurance identified to us during an inspection conducted by the federal Food and Drug Administration between January and March 2017.

Any compounded sterile preparation dispensed by the pharmacy between November 16, 2016 and January 26, 2017 is subject to this recall notice. The drug preparations all bear a label identifying the drug by name and bearing a 'discard after' date.

Non-sterile compounded preparations are not subject to the recall. Nor are compounded sterile preparations shipped outside of the above date range.

All unexpired lots of the following sterile compounded preparations are subject to the recall:
DISPENSED BETWEEN: November 16,2016 and January 26,2017
