

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Belmar Select Outsourcing (BSO) – Lakewood, CO, is announcing the recall of eight (8) lots of terminally sterilized implantable hormone pellets compounded between 01/02/2025 and 02/28/2025 due to the possibility of the presence of glass particles inside the pellet vial. The lots were released prior to the completion of an investigation. All the batches impacted by this recall were 100% visually inspected prior to release and no batch had an incidence of glass particles higher than 0.2%.

This recall is a action taken by BSO Lakewood out of an abundance of caution to protect the public health and well-being from medications that may present a risk of adverse events. Administration of glass particles with a pellet may result in irritation or an inflammatory response, infection and extrusion. This could be an immediate or delayed reaction (days to months). We encourage you to reach out to your patients if you have concerns.

To date, we have not received any reports of glass in pellet vials from providers. If you discover any glass particles in any BSO Lakewood pellet vials, please call us at (303) 729-0310. If you have any patients who are experiencing any adverse effects you suspect may be related to glass particles, please contact BSO Lakewood. You may also report side effects to the FDA Medwatch program at 1-800-FDA-1088.
