

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Imprimis NJOF is recalling Epinephrine-Lidocaine (0.25 mg/mL, 7.5 mg/mL) Preservative-Free Intraocular Solution for Injection. Imprimis has determined that current stability data for Epinephrine/Lidocaine does not support the assigned expiration date. Potency specifications for Epinephrine/Lidocaine should be between 90.0-110.0%, and we recently identified that stability batches had subpotent Epinephrine assay levels of 86.9%. The subpotent Epinephrine may result in reduced effectiveness when used on patients. Out of an abundance of caution, Imprimis has initiated a voluntary recall of all unexpired lots of Epinephrine/Lidocaine (0.25 mg/mL, 7.5 mg/mL) Sterile Ophthalmic Injectable that are represented by the failed stability lot.

All of the identified lots obtained passing results for sterility, potency, bacterial endotoxin testing, identification, container content for injection, finished product pH, particulate matter, and description/color/clarity testing prior to release. Additionally, each lot was fully reviewed and dispositioned by members of the Quality Assurance department prior to release.

Product Name: Epinephrine-Lidocaine (0.25 mg/mL, 7.5 mg/mL) Preservative-Free Intraocular Solution for Injection

Description: Single-Use Sterile Intraocular Solution for Injection

NDC: 71384-640-01
