

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

This is to notify you that Fresenius Kabi USA, LLC ("Fresenius Kabi") is recalling the below-mentioned batches of Epinephrine Injection, USP, 1 mg/mL (1 mg/ mL), 1 mL fill in a 2 mL vial.

This recall is being performed to the user level. Fresenius Kabi has decided to take this action due to physicochemical out-of-specification (OOS) results at the 18-month stability test station. Out of an abundance of caution, batches 6134812 and 6134813 are also included in this recall.

The Health Hazard Evaluation concluded an overall low risk to patients. No adverse event reports have been received for any of the below-listed batches to date.

Product Name/Product Size	Unit of Use NDC Number	Unit of Sale NDC Number	Product Code	Batch Number	Expiration Date	First Ship Date	Last Ship Date
