

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Glenmark is requesting a Market Withdrawal at Wholesaler level involving the following Ryaltris Nasal Spray batches due to an Out of Specification (OOS) result detected in assay test during release testing in a batch which was not distributed to market and rejected. Based upon the investigation outcome and quality recommendation, the above distributed batches are being withdrawn from market out of an abundance of caution. The batches subject to this market withdrawal met all initial release and stability testing parameters and are well within specification including assay. A medical assessment has been completed and the risk to user is considered low.
