

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Sagent Pharmaceuticals is recalling Oxacillin for Injection, USP. This recall is being issued out of an abundance of caution to the hospital level. The Contract Manufacturing Organization reported to Sagent that through routine environmental monitoring they detected procedural discrepancies associated with the cleaning and disinfection process at their production facility that may compromise the sterility assurance of the drug products. The procedural inconsistencies, coupled with inadequate validation, have prompted Sagent Pharmaceuticals to take this action.

Risk Statement: Intravenous administration of a product intended to be sterile that is not sterile could result in serious systemic infections which may be life threatening. To date, Sagent has not received reports of any adverse events related to products subject to this recall.

Product	Lot Number	Expiration Date	NDC #
Oxacillin for Injection, USP 10 grams, Multi	OXT202	5/31/2025	25021-163-99
