

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

This is to inform you of a product recall involving certain lots of Glutathione compounded by Greenwich Rx. This compounded Glutathione was dispensed between 06/29/2026 – 09/21/2026.

FDA has publicly reported adverse events consistent with endotoxin exposure following **intravenous** (IV) administration of glutathione compounded using certain dietary supplement grade ingredients. Greenwich Rx does not compound Glutathione for IV administration. However, we are initiating this recall because the recalled Glutathione was compounded using an ingredient that was labeled as dietary supplement grade.

Ingredients labeled for dietary supplement use may contain impurities and contaminants, including endotoxins, that may be harmful when administered as an injectable drug. Exposure to high levels of endotoxins can cause a sudden reaction. Symptoms may include fevers and chills, body aches, headache, nausea, dizziness, and low blood pressure. To date, Greenwich Rx has received two reports involving patients who received emergency department care following IV administration of a product not formulated for IV use. Each of the recalled lots was tested for bacterial endotoxins prior to release, and all results met specifications.

Product	Strength	Package Size	Lot Number	Beyond Use Date
Glutathione	200 mg/mL	10mL	0060-062426-1	10/02/2026
Glutathione	200 mg/mL	10mL	0060-062726-1	10/05/2026
