The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

This is to inform you of a recall involving VECURONIUM BROMIDE FOR INJECTION, 10 MG/VIAL AND 20 MG/VIAL, distributed by Meitheal Pharmaceuticals.

This recall has been initiated due to the affected vials have a plain, unprinted cap/overseal that does not display the statement "WARNING: PARALYZING AGENT." The warning remains on the vial label; the omission is specific to the cap/overseal. Vecuronium is a neuromuscular blocking agent. If it is inadvertently administered to an unintended patient, it can cause respiratory paralysis, serious injury, or death. Meitheal has not identified a medication error or adverse event attributable to the missing cap warning in the information reviewed through September 8, 2026.

Our records show that affected product was shipped on Dec 22, 2025 – Sep 8, 2026.

VECURONIUM BROMIDE FOR INJECTION, 10 MG/VIAL AND 20 MG/VIAL
