

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Merck Sharp & Dohme Corp. (Merck) is recalling **CUBICIN® (daptomycin for injection) 500 mg in single-dose vials, Lot 934778, Exp Jun 2022**. This product was **distributed between 01-Jun-2021 and 09-Sep-2021**. This recall should be carried out to the user level, including hospital and administering institutions.

This recall has been initiated because of a customer complaint indicating that a "piece of glass" was found in a vial of CUBICIN® 500 mg (lot 934778) after reconstitution. Because treatment with CUBICIN is likely to be initiated at a hospital or other monitored healthcare setting, the recall is being conducted to the user level, including hospital and administering institutions.
