The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

On October 15, 2026, in the interest of patient safety, Octapharma USA, Inc. initiated a market withdrawal of the above lot of PANZYGA® [Immune Globulin Intravenous (human)] - ifas 10% Liquid Preparation]. Octapharma has initiated this withdrawal because of an increased number of reports of hypersensitivity events. Pfizer is a distributor of PANZYGA® in the United States and Octapharma has requested that we initiate this market withdrawal from Pfizer's direct customers. Although there have been no reports of serious injury to date, Octapharma has determined that the most prudent course of action is to suspend further administration of this single lot of PANZYGA®.

The affected lot was distributed between December 17, 2025 through October 1, 2026.
