

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Baxter is recalling certain lots of Ondansetron Injection 4mg/2mL to the Consumer level. This recall was initiated due to the pH level parameter of these impacted lots may be out of specification. (Please see attached manufacturer's drug recall notice.) Since Cardinal Health Private Label purchased the Ondansetron lots to repackage, it is necessary for us to recall the repackaged Assist bags of 5s repackaged from the affected lots. This item was first shipped 6/8/2022. This recall affects the lots listed below remaining in distribution.
