Dr. Reddy's is recalling the above items/lots due to USFDA alert notice regarding low levels of N-nitrosodimethylamine (NDMA) impurity found in some samples of Ranitidine medicines, subsequent preliminary test results at Dr. Reddy's laboratories for some for the Drug Substance (API) lots used in Drug Product manufacturing have levels of NDMA that could potentially contribute to elevated levels of NDMA in Drug Product with respect to the maximum allowable daily limit. This recall is to the Consumer level for all prescription products, and at the retail level for over-the-counter products. This recall was expanded to the consumer level for prescription products based on the USFDA's recent feedback that all NDMA-related prescription drug recalls are to be expanded to the consumer level. Affected product started shipping January 2017.

The Board of Pharmacy strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.
