Enforcement and Compounding Committee Report

Maria Serpa, Licensee Member, Chair Jignesh Patel, Licensee Member, Vice-Chair Seung Oh, Licensee Member, President Ricardo Sanchez, Public Member Debbie Veale, Licensee Member

a. <u>Discussion and Consideration of Enrolled or Recently Signed Legislation Impacting the Practice of</u> <u>Pharmacy</u>

1. Assembly Bill 107 (Salas) Licensure: Veterans and Military Spouses.

Summary: Requires the Board to issue temporary licenses to practice. As provided, the Board would be required to issue the temporary license within 30 days of receiving fingerprint background checks. Further, pharmacist applicants would be required to take and pass the CPJE prior to issuance of the temporary license.

Implementation: Although the provisions become effective July 1, 2023, there are implementation activities that must begin in advance. Such activities include developing the appropriate attestations for each of the Board's license types, updating application and instruction forms, developing internal tracking systems, developing educational on the provisions and securing the necessary programming changes. It appears appropriate to develop regulations detailing the types of evidence needed to show compliance with the provisions (e.g., proof of marriage, domestic partnership, etc.) and well as under what circumstances the Board may request information. The Committee may wish to recommend referral of another committee to further development the scope and language for proposed regulations.

2. Assembly Bill 527 (Wood, Chapter 618, Statutes of 2021) Controlled Substances

Summary: Exempts specified non-narcotic combination product controlled substances from the California controlled substances schedule.

Implementation: Implementation efforts should be minimal and include education of the change.

3. <u>Assembly Bill 1064 (Fong) Pharmacy Practice: Vaccines: Independent Initiation and</u> <u>Administration</u>

Summary: Expands authority to allow a pharmacist to independently initiate and administer any vaccine that has been approved or authorized by the FDA and received an ACIP recommendation published by the CDC for persons 3 years of age and older. **Implementation**: Implementation efforts will focus primarily on education of the change.

Enforcement and Compounding Committee Chair Report October 20, 2021 Page 1 of 7

4. <u>Assembly Bill 1533 (Assembly Committee on Business and Professions, Chapter 629, Statutes of 2021) Pharmacy</u>

BPC 4001, 4003 Summary: This measure extends the operations of the Board until January 1, 2026. Further, modifies the allocation of pharmacist members to also include a pharmacy compounding specializing in human drug preparation.

Implementation: Staff recommends completion of an annual report to include the primary reporting elements of the Sunset report to be reviewed as part of the July meeting for each year. Staff notes that changes to the membership of the Board will be implemented by the administration.

BPC 4052(a)(13) Summary: Expands authority for pharmacists to initiate, adjust, or discontinue drug therapy for a patient under a collaborative practice agreement with a healthcare provider with prescriptive authority.

Implementation: Implementation efforts will focus primarily on education about the provisions, which could be extensive.

BPC 4052(a)(14) Summary: Expands authority for pharmacists to provide medication-assist treatment pursuant to a state protocol.

Implementation: Will require the Board to develop a state protocol via regulation. It may be appropriate for the Committee to determine if a recommendation should be offered to the Board regarding which committee should spearhead this effort.

BPC 4052.6 Summary: Expands that authority for an advanced practice pharmacist to initiate, adjust, or discontinue drug therapy beyond health care facilities.

Implementation: Implementation efforts will focus primarily on education about the provisions and should reiterate the provisions for coordination of care and education with the patient's diagnosing prescriber.

BPC 4110, 4126.10 Summary: Establishes the requirement for a pharmacy to report, as part of the renewal application, notification to the Board regarding compounding practices and reporting requirements for pharmacies distributing compounded human drug preparations. Note: These provisions are necessary to allow the Board to enter into the FDA MOU. The Board will also need to secure the necessary resources to meet the obligations of the MOU. **Implementation**: Implementation efforts will include updating renewal forms and data systems, instructions and other educational materials.

BPC 4129 Summary: Expands authority for outsourcing facilities licensed by the Board to dispense patient-specific compounded drug preparations under specified conditions, including that the outsourcing facility comply with the same requirements of a pharmacy.

Implementation: Implementation efforts will include the development of educational materials and extensive education on the relevant provisions that outsourcers must comply with when exercising this new authority. Such education is necessary to allow for harmony with federal provisions while ensuring patients have access to pharmacist care, including drug utilization review, patient-centered labeling, patient consultation, etc.

Section 4161 Summary: Creates alternative pathways to licensure as a nonresident third-party logistics provider to allow for a pre-licensure inspection by the Board or evidence of accreditation by the NABP Drug Distributor Accreditation program.

Implementation: Implementation efforts will include updating application instructions and forms and development of forms. Further, in response to the COVID-19 pandemic, under its waiver authority, the Board granted waivers to issue temporary licenses to entities to facilitate

Agenda Item V - Enforcement and Compounding Committee Chair Report October 27-28, 2021 Board Meeting Page 2 of 7 distribution of various items, including ventilators and vaccines. As these licenses are limited in duration, transition activities will need to be undertaken to ensure continuity of patient care effective January 1, 2022.

Section 4210 Summary: Alters the application requirements for an advanced practice pharmacy to allow for qualification under a single pathway, if the pathway requires completion of a second criterion.

Implementation: Implementation efforts will include updating application instructions and forms and the development of educational materials. Staff will also review pending applications to determine if the changes provided in the measure will impact applicant eligibility.

Section 4232.5 Summary: Requires a pharmacist with authority to prescribe a controlled substance to complete an education course on the risks of addiction to Schedule II drugs. Implementation: Implementation efforts will include updating the Board's renewal application requirements via regulation to give notice of this requirement and how to demonstrate compliance. The Committee may wish to recommend referral of another committee to further development the scope and language for proposed regulations.

Section 4301.3 Summary: Requires the Board to convene a working group of interested stakeholders to discuss whether moving to a standard of care enforcement model would be feasible and appropriate. Also, requires the Board to make recommendations to the Legislature after these discussions.

Implementation: Education on standard of care, including how the Board currently uses such a model and assessment of further use will be required. Under the provisions of the Board's administrative procedure manual, the president has the authority to establish an ad hoc committee. Such an approach may be appropriate. Given the short duration of time to conduct this work and prepare a report, it is recommended that the efforts begin in the third quarter of the current fiscal year.

Section 4317.5 Summary: Provides the Board with authority to issue fines of up to \$100,000 for repeated violations within five years by three or more community chain pharmacies operating under common ownership. Further provides the Board with authority to issue fines up to \$150,000 for any violation of this chapter demonstrated to be the result of a written policy or which was expressly encouraged by the owner or manager. The measure provides an opportunity to cure a violation as long as the violation did not result in actual harm to any consumer or pose serious potential harm to the public.

Implementation: Implementation will include education about the provisions and evaluation of investigations to determine if the new authorities provided are applicable. Data on implementation will be maintained and reported back to the Committee and Board. Data collected will also be a required element of the Board's next Sunset Report.

Section 4427.65 Summary: Expands the locations where unit-dose automated drug delivery systems may be located.

Implementation: Implementation will include education on the provisions.

5. <u>Senate Bill 306 (Pan, Chapter 486, Statutes of 2021) Sexually Transmitted Disease: Testing</u> Summary: This bill will allow a pharmacist to dispense a medication without an individual name if the prescriptions includes "expedited partner therapy" or EPT. Further, requires a pharmacist to provide a written notice that describes the right of an individual receiving EPT to consult with a pharmacist about the therapy and potential drug interactions.

Implementation: Implementation efforts will focus primarily on education of the change.

6. <u>Senate Bill 310 (Rubio, Chapter 541, Statutes of 2021) Unused Medications: Cancer Medication</u> <u>Recycling</u>

Summary: Creates a cancer medication collection and distribution program under the direction of a surplus medication collection and distribution intermediary licensed by the Board. Provides allowances for patients to donate previously dispensed medications back to a participating practitioner for redistribution to other patients of the same practitioner or medical practice. Provides authority for the Board to request records to evaluate for compliance with the provisions and to prohibit a practitioner from participating under specified conditions. **Implementation**: Implementation efforts will focus primarily on education about the provisions of the measure to the public as well as extensive education of identified Board staff to ensure the appropriate development of policies and procedures, drug manufacturing requirements, etc. to ensure appropriate patient protections exist for the recycled medications. Data will be collected and reported to the Committee.

7. <u>Senate Bill 311 (Hueso, Chapter 384, Statutes of 2021) Compassionate Access to Medical</u> <u>Cannabis or Ryan's Law</u>

Summary: Requires health care facilities to allow a terminally ill patient to use medical cannabis under specified conditions. Specifies that health care facilities permitting patient use of medicinal cannabis must comply with drug and medication requirements applicable to Schedule II, III, and IV drugs and shall be subject to enforcement actions by the California Department of Public Health.

Implementation: Late amendments to the measure, notably HSC Section 1649.3, appear to create some conflicts within the measure itself including the requirements that medicinal cannabis comply with provisions related to Schedule II-IV medications. Such a requirement creates a number of questions about the applicability of provisions of the Board's regulations including storage, inventory control, acquisition, etc. It appears appropriate for the Committee to evaluate this issue and work to resolve the conflicts with other regulators and stakeholders. Similar issues have occurred in other states where additional concerns regarding federal laws and regulations that impact health facility licensure, accreditation and reimbursement have limited the access. In the interim, it may be appropriate for the Committee to consider if it is appropriate to provide staff with direction on the approach to education and enforcement until clarification via statute can be achieved.

- Senate Bill 362 (Newman, Chapter 334, Statutes of 2021) Chain Community Pharmacies: Quotas Summary: Prohibits a community chain pharmacy from using a quota to evaluate the performance of a pharmacist or pharmacy technician.
 Implementation: Implementation efforts will include education about the provisions as well as the process a pharmacist or pharmacy technician may use to file a complaint. Educational efforts should also include information about whistleblower protections. Data on implementation will be provided to the Committee.
- Senate Bill 409 (Caballero, Chapter 604, Statutes of 2021) Pharmacy Practice: Testing Summary: Expands authority for pharmacists to provide CLIA-waived tests under specified conditions.

Implementation: Implementation efforts will include education of the provisions and updates to the Board's Health Services Registry to capture these additional services for patients.

b. <u>Discussion and Consideration of Released Revised Proposed Changes to USP Chapters 795 and 797</u> and the Board's Current Policy Statement

Relevant Law

<u>Section 503A of the Food, Drug and Cosmetic Act</u> establishes requirements for preparing human drug compounded preparations within a state-licensed pharmacy, federal facility, or by a licensed physician that is not registered with the FDA as an outsourcing facility.

<u>BPC Section 4126.8</u> provides that compounding of drug preparations shall be consistent with standards established in the pharmacy compounding chapters of the current version of the United States Pharmacopeia-National Formulary (USP-NF), including relevant testing and quality assurance. Further, the Board may adopt regulations to impose additional standards.

<u>BPC Section 4127(c)</u> requires the Board to review any formal revision to General Chapter 797 of the USP-NF relating to the compounding of sterile preparations, no later than 90 days after the revisions become official to determine whether amendments are necessary for the regulations adopted by the Board.

<u>BPC Section 4342</u> provides authority for the Board to institute any action provided by law, that in its discretion, is necessary to prevent the sale of pharmaceutical preparations and drugs that do not conform to the standard and tests as to quality and strength provided in the latest addition of USP or that violate any provisions of the Sherman Food, Drug, and Cosmetic Law.

<u>California Code of Regulations Section 1708.3 – 1708.5</u> provides general requirements for radioactive drugs.

<u>California Code of Regulations Section 1735 et seq.</u> establishes requirements for the compounding of preparations. Further, <u>California Code of Regulations Section 1751 et. seq.</u> establishes additional requirements for the compounding of sterile preparations.

Background

In response to significant proposed changes to USP compounding chapters, the Board established an ad hoc Compounding Committee to review the proposed changes and determine what, if any, changes to the Board's regulations were necessary to ensure appropriate, safe and efficacious compounded preparations are provided to California consumers. In 2019 the Committee convened several meetings to provide education on the new proposed chapters as well as consider current regulation requirements and offer recommendations to change the current requirements. The meetings were well attended and provided an opportunity for robust discussion and development of language in response to proposed 2019 changes. Appeals were received by USP in response to the proposed Chapters which resulted in a delay in implementation. Based on USP, the Board similarly postponed additional action. On September 1, 2021, USP released proposed updates to <u>USP General Chapters 795 and 797</u>. As provided in these proposed revisions, the minimum standards described apply when preparing compounded nonsterile and sterile preparations for humans and animals.

For Committee Consideration and Discussion

Given the release of the proposed revisions it appears appropriate for the Committee to determine whether it should resume education efforts and begin evaluation of the Board's regulations. It may also be appropriate to release an updated policy statement providing guidance to licensees about the Board's understanding of the current status of the provisions governing the practice of compounding.

Provided in **Attachment 1** includes high level comparison charts detailing current USP standards, USP 2019 proposed version and newly released 2021 versions of USP Chapters 795 and 797. Also, provided is a draft policy statement that could be used to provide guidance to licensees.

c. Updates on FDA Actions Related to Human Compounding

1. <u>FDA's Final MOU on Interstate Distribution of Compounded Drug Products (For Information only)</u>

On August 9, 2021, the FDA released a <u>notice</u> of extension of the period before it intends to begin enforcing the statutory five percent limit on out of state distribution of human drug products. Under the summary of the notice, the FDA is extending the period to October 27, 2022, providing states with an additional year to complete evaluation and make necessary changes to law to meet the obligations of the MOU.

2. <u>Guidance for Industry Hospital and Health System Compounding (For Information Only)</u>

On October 7, 2021 the FDA released a draft guidance document, <u>Hospital and Health System</u> <u>Compounding Under Section 503A of the Federal Food, Drug, and Cosmetic Act Guidance for</u> <u>Industry</u>. The draft guidance describes how the FDA intends to apply certain provisions of section 503A of the FD&C to human drug products that are compounded by state-licensed pharmacies for distribution within a hospital or health-system. Written comments must be submitted by December 6, 2021.

d. <u>Review and Discussion of Enforcement Statistics</u>

Since July 1, 2021, the board received 715 complaints and has closed 813 investigations. The board has issued 92 Letters of Admonishment, 359 Citations and referred 49 cases to the Office of the Attorney General. The board has secured 0 interim suspension orders and granted 0 Penal Code 23 suspensions. Further, the board has revoked 19 licenses, accepted the disciplinary surrender of 18 licenses, denied 1 application, and imposed other levels of discipline against 31 licensees and/or applicants.

As of October 1, 2021, the board had 974 field investigations pending. Below is a breakdown providing more detail in the various investigation process:

| | July 3 | , 2021 | October 1 | , 2021 |
|-------------------------------|--------|---------|----------------|--------|
| | Volume | Average | Average Volume | |
| | | Days | | Days |
| Cases Under Review for | 41 | 18 | 71 | 14 |

Attachment 2 includes the current fiscal year enforcement statistics.

e. <u>Future Committee Meeting Dates</u>

- January 18, 2022
- April 20, 2022
- July 19, 2022
- October 19, 2022

Attachment 1

| Item | Current 2008 | USP 2019 | USP 2021 |
|---|--|---|---|
| Personal Hygiene and Garbing | No specific requirements | Gloves are required for all compounding activities Other garb must be used as appropriate for the type of compounding | If gown is to be reused it must remain in the compounding area |
| Garb and Glove requirements | No specific requirements | A gown may be reused if not soiled and stored in the compounding area. Gloves, shoe covers, face and head covers and masks may not be reused. Non-disposal garb must be appropriately sanitized with 70% IPA. | No additional requirements |
| Building and facilities | Adequate space specifically designated for compounding and well organized. components, equipment and containers stored off the floor. | Compounding non-hazardous CNSPs shall not be in the same area as hazardous CNSP. Surfaces of ceilings, walls, floors, fixtures, shelving, counters and cabinets must be cleanable and kept clean. Carpet is not allowed | Designated space for nonsterile compounding Space is controlled Space is cleanable and clean Must monitor temperatures in the storage area |
| Cleaning and Sanitizing | No specific requirements | CVE and work surfaces outside CVE: each shift, after spills , contamination, between CNSPs Clean and sanitize the horizontal work surface of the CVE between compounding of different drugs. Equipment: Before first use and per manufacture | Work surfaces: each shift, after spills , contamination, between CNSPs Floors: daily Walls: 3 months Ceilings/storage shelving: when soiled or contamination Cleaning must always be performed prior to sanitizing. Must be documented |
| Equipment | Store and cleaned appropriately. Special equipment to avoid cross contamination. | Must be non-reactive. Stored to prevent contamination. Manipulation of any component must take place in the CVE CVE must be cleaned CVE must be certified annually | No additional requirements |
| Components | Allows the use of non-FDA components or analytical grade components. Purified water shall be used | APIs must be manufactured by an FDA-registered facility Each API must be accompanied by a valid COA | Purified water USP or better must be used in compounding. |
| Component Storage and evaluation | Store per manuf. Guidelines and off the floor. If no expiration date, three years from purchase. | Packages of ingredients that lack vendor expiration must not be used after 1 year from the date of receipt. Verify component prior to use. | Packages of ingredients that lack vendor expiration must not be used after 3 year from the date of receipt. |
| Master Formulation and Compounding records | Master Formulation and Compounding record must be reviewed by the compounder. Comply with local state BOP for records requirements | Master formulation record (MFR) for each unique formulation of a CNSP. 8 required elements for MFR Compounding record created for all CNSPs. 13 required elements for compounding record | 13 required elements for MFR |
| BUD 795 | Water containing oral formulations = 14 days Water-containing topical/dermal and mucosal liquids and semisolid = 30 days Nonaqueous formulations = 180 days | Non-preserved aqueous (Aw > 0.6) = 14 days Preserved aqueous (Aw > 0.6) = 35 days Nonaqueous dosage forms (Aw ≤ 0.6) = 90 days Solid dosage forms = 180 days | Without stability information:Aqueous (Aw > 0.6) Non-preserved = 14 days frigAqueous (Aw > 0.6) preserved = 35 days CRT or frigNonaqueous (Aw < 0.6) oral liquid = 90 days CRT or frig |

Adapted from: USP Open forum Event 9/15/21, https://www.usp.org/events-training/virtual-open-forum-series-proposed-revisions-to-compounding-general-chapters

In light of the September 1, 2021 release by USP of proposed updates to USP General Chapters <795> and <797>, the California State Board of Pharmacy (Board) wishes to update its stakeholders on the anticipated next steps the Board will be taking and also remind stakeholders about the current status of legal requirements for pharmacies compounding drug preparations. It is the Board's understanding that USP published proposed revisions to USP General Chapter <795> Pharmaceutical Compounding – Nonsterile Preparations and General Chapter <797> Pharmaceutical Compounding – Sterile Preparations for public comment. It is the Board's understanding that comments may be submitted on or before January 31, 2022. Further, USP will host virtual Compounding Open Forum Series in January 2022.

The Board understands that based on the appeals to the 2019 proposed revisions to Chapters <795> and <797>, further changes were made to these proposed chapters. Accordingly, the current Chapters <795> (last revised in 2014) and <797> (last revised in 2008) remain the official versions of USP standards. In addition, all licensees must adhere to all relevant sections of Pharmacy Law and regulations, including but not limited to the Board's current regulations – title 16, California Code of Regulations, section 1735 et. Seq (Article 4.5, Compounding); section 1751 et. Seq. (Article 7, Sterile Compounding); and section 1708.3 to section 1708.5 (related to radioactive drugs) – and Business and Professions Code section 4126.8 and other relevant state and federal provisions.

It is the Board's understanding that USP is not offering any additional changes to Chapter <800> or Chapter <825>. Because Chapter <800> and Chapter <825> are not referenced in the current versions of Chapters <795> and <797>, Chapters <800> and <825> appear informational and not compendially applicable (or a required standard under USP) until the amendments in Chapters <795> and <797> are finalized. Like USP, the Board encourages utilization of amended Chapter <800> in the interest of advancing public health before it becomes a required USP standard by USP adoption of revised Chapters <795> and <797>. States and other regulators with jurisdiction, also may incorporate USP chapters that are not compendially applicable (required USP standards) into their own statutes or regulations, or "through other steps in accordance with their own policy making processes" to apply or enforce chapters that are not yet required USP standards.

As required in Business in Professions Code section 4127(c), the Board's Enforcement and Compounding Committee intends to resume it discussion of the new proposed revised chapters. Although it is the Board's goal to seek conformity with USP where possible, consistent with the Board's consumer protection mandate and the authority granted to the Board by the Legislature in Business and Professions Code section 4126.8, it is anticipated that the Board's efforts may result in updates to its current regulations, including higher standards if deemed necessary for public protection. Information on meetings will be posted on the website and meeting materials made available in advance.

October 2021
