

LICENSING COMMITTEE REPORT

Seung Oh, PharmD, Licensee Member, Chairperson

Trevor Chandler, Public Member, Vice-Chairperson

Renee Barker, PharmD, Licensee Member

Jessica Crowley, PharmD, Licensee Member

Claudia Mercado, Public Member

Satinder Sandhu, PharmD, Licensee Member

a. Summary of Presentations and Discussion of Pharmacy Practice Experience Requirements Pursuant to Business and Professions Code Section 4209

Relevant Law

Business and Professions Code (BPC) section 4209 establishes a requirement for an intern pharmacist to complete 1,500 hours of pharmacy practice experience before applying for the pharmacist licensure examination as specified.

Subdivision (d) of the section provides that an applicant for the examination who has graduated after January 1, 2016, from an ACPE (Accreditation Council for Pharmacy Education) accredited college of pharmacy shall be deemed to have satisfied the pharmacy practice experience requirement.

Background

The ACPE is recognized by the US Department of Education as the national agency for the accreditation of professional degree programs in pharmacy. The ACPE Board of Directors approved the new accreditation standards in 2024 with an effective date of July 1, 2025. All pharmacy programs were required to comply with the [new standards](#) by the effective date. Specifically related to intern hours requirements, the new standards consolidated Introductory Pharmacy Practice Experience (IPPE) and Advanced Pharmacy Practice Experience (APPE) into a new standard, Experiential Learning.

The number of experiential learning hours appears to remain consistent. The standard requires at least 300 hours of IPPE experience including a minimum of 75 IPPE hours in patient care in both the community and hospital/health system settings. The remaining hours may be earned in a variety of pharmacy practice settings that expose students to patient care. In addition, 1440 hours of APPE experience must be earned.

The standards also provide that each APPE rotation must be a minimum of 160 hours. The majority of APPE curriculum must be focused on patient care. The

standards specify that APPEs must be completed in the US or its territories and occur in four practice settings:

1. Community pharmacy
2. Ambulatory care
3. Hospital/health system pharmacy
4. Inpatient adult patient care

The standards allow for elective APPEs, with a maximum of 320 hours of non-patient care elective APPEs. Note: Given the standards, it is possible for a student to graduate without completing 1,500 hours of patient care experience.

Over the past few years, members have received comments both during meetings and during events regarding the pharmacy practice experience requirements and suggestions that the Board should reestablish a requirement for an intern pharmacist to complete internship hours outside of the advanced pharmacy practice experience rotations completed as part of the pharmacy education.

Summary of Committee Discussion

During the meeting, members received three presentations on this issue from the following:

1. Sarah McBane, PharmD, Associate Dean, University of California Irvine
2. James Scott, PharmD, Former Dean, Touro University
3. Scott Takahashi, PharmD, FCSHP, FASHP

Dr. McBane's presentation provided an overview of key changes in the new ACPE accreditation standards that include diagnosing and prescribing. The presentation discussed requirements for pharmacy programs to collect and assess outcomes of experiential training to evaluate the quality of the education. Dr. McBane noted that students must complete introductory experience and advanced experience and that documentation is required by the accreditation agency to demonstrate the quality of the experience.

Dr. Scott's presentation reiterated some of the experience requirements for pharmacy education and noted that all California schools have established 240 hour experiential rotations. Dr. Scott noted that some pharmacy degree programs use an accelerated program that allows students to complete the PharmD education in three years through year round learning (as opposed to a four year program.) Dr. Scott suggested that a requirement to earn additional intern hours outside of the student's education would be a burden for some students.

Dr. Takahashi provided background on his role, including his experience as an adjunct professor at multiple institutions and as a preceptor, and noted that he has seen a change in graduates over time. Dr. Takahashi suggested that this change is in part because of the lack of intern experience gained. Dr. Takahashi

noted a difference in pharmacy practice experience earned through a student's education that is instructional in nature versus experience earned outside of the school program that allows for integration of education into practice experience. Dr. Takahashi suggested that some new graduates are having challenges completing residencies and passing the pharmacist licensure exam.

The presentations may be viewed [here](#).

Members discussed the issue including their respective experience. Some members noted the potential value in completing intern experience beyond the experiential training gained in their pharmacy program, highlighting the difference between experience earned as part of pharmacy school education where students "observe" as opposed to working as an intern where they "practice." Members noted on a personal level that it was challenging but important to their development as a pharmacist. Members discussed that some new graduates are entering practice without requisite knowledge of workplace requirements, adhering to work schedules, etc. Members also spoke about the difference between treating pharmacy practice as "just a job" versus as a profession and questioned if this could be a contributing factor to trends being observed.

Members considered if the Board should consider some changes in the current requirements to include some outside intern experience. Members considered if there is a way for the Board to incentivize outside experience versus mandating additional experience.

Public comment suggested that most states do not have experience requirements outside of school rotations. Some commenters encouraged the Board to put concerns about generational trends and perceived changes in work ethic aside, and ask whether requiring experience hours outside of those obtained in pharmacy school will improve patient safety.

Other public comment spoke in support of the need to change the current requirements.

Public comment also noted that students cannot be paid for their experiential training in school, suggesting that there may be a value in allowing students to be paid for such training.

The Committee is not offering any recommendations at this time and will continue its discussion during its next meeting. Among the items to be considered will be if the Board can develop a program to incentivize completion of intern experience earned outside of a school program.

- b. **Summary of Discussion of Changes in Pharmacy Law Included in, and Proposed Implementation Activities Regarding, Assembly Bill 1503 (Berman, Chapter 196, Statutes of 2025), Including Possible Discussion and Action to**
 - i. **Approve Policy Statements Regarding**
 - 1. **The Transition to a Standard of Care Practice Model**
 - 2. **The Role of the Pharmacist-in-Charge**
 - ii. **Initiate Rulemaking to Add Section 1717.11 Related to Remote Processing of Prescriptions to California Code of Regulations, Title 16.**

Background

Assembly Bill (AB) 1503 is the Board's sunset measure. The measure extends the operations of the Board until January 1, 2030, and also includes a number of policy issues raised by the Board in its 2025 Sunset Oversight Review Report. The measure was approved by Governor Newsom on October 1, 2025.

Given the comprehensive nature of the measure, significant implementation activities will be required.

During the meeting, members discussed changes to Pharmacy Law that are included in AB 1503 and recommended implementation activities. Members noted that traditionally, education on changes to Pharmacy Law is included in the Board's mandatory online pharmacy law course, detailed in the Board's newsletter, reflected in updated versions of the relevant self-assessment form, and displayed on the Board's website.

New Section 4001.5, Related to a Pharmacy Technician Advisory Committee

Summary: This new section will require the Board to establish an advisory committee to advise and make recommendations to the Board on matters related to pharmacy technicians. The committee shall consist of four licensed pharmacy technicians representing a range of practice settings; two licensed pharmacists, one of whom shall be a member of the Board; and one public member.

Summary of Committee Discussion

Members discussed the composition of the advisory committee and considered the minimum qualifications, the tenure of the positions, and the appointment process. Members noted the need to ensure interested parties are aware of the opportunity to serve on the committee and noted that the legislation did not specify a timeline to establish the committee.

Public comment suggested that interested individuals should have 10 years of experience and represent various practice settings. Additional public comment noted that the advisory committee provides an opportunity for pharmacy technicians to come together and suggested that the Board should consider

including a skills assessment as part of the appointment process. Other comments suggested the Board should stagger terms.

Recommended Action: The Committee recommends an online application process and the following parameters:

1. Apart from the Pharmacist Board member appointee, appointee terms will be four years, with the ability to be reappointed once. [**Note:** The first appointment tenures will vary in length to stagger appointments in the future.]
2. Pharmacy technician positions should include:
 - a. 1 position representing community pharmacy practice
 - b. 1 position representing hospital pharmacy practice
 - c. 2 positions unspecified practice
3. Pharmacist position from any practice site
4. Application process should include the following:
 - a. 1 Letter of intent
 - b. 2 letters of recommendation (including one from a current employer and one from a California licensed pharmacist.)
 - c. CV or resume
5. Licensed appointees shall have at least three years of experience as a pharmacist or pharmacy technician gained from a single employer.

The Committee seeks further guidance from the Board on the appointment process.

Amended Sections 4016.5, 4210, and 4233, Related to Advanced Pharmacist Practitioners (Formerly Known as Advanced Practice Pharmacists)

Summary: Renames the title “Advanced Practice Pharmacist” to “Advanced Pharmacist Practitioner.”

Summary of Committee Discussion

Members noted that implementation of the provisions would be relatively straightforward and concurred that the recommended implementation activities were appropriate.

Public comment noted agreement with recommended implementation activities and questioned if the Board would establish a new license prefix and if currently licensed advanced practice pharmacists would receive a new license reflecting the new license title.

Recommended Action: The Committee recommends that the executive officer pursue a Section 100 change to affected regulations to reflect the new license title. Changes will be required in the following sections of title 16, California Code of Regulations (CCR): 1702, 1702.1, 1706.6, 1730, 1730.1, 1730.2, and 1749.

Note: Following the meeting it was determined that currently licensed advanced practice pharmacists will receive a license reflecting the new license title as part of the general renewal process. Individuals seeking an updated license prior to their normal renewal date will need to submit a request for the reissuance of the license along with the required fee. Staff further note that the license prefix will not change and will remain APH.

Amended Section 4036 Pharmacist Defined

Summary: Updates the definition of “pharmacist” to provide that the holder of an unexpired and active pharmacist license issued by the Board is entitled to practice pharmacy as defined by the chapter, within or outside of a licensed pharmacy.

Summary of Committee Discussion

Members noted support for developing regulations to more broadly allow for remote processing of prescriptions. Members considered draft regulation language and sought to ensure the draft language included sufficient security provisions. Members also suggested that the language could be simplified to defer in part to the pharmacy’s policies and procedures.

Public comment spoke in support of the Board developing regulations and requested that the Board move the regulations quickly. Public comment also suggested that the draft language may be confusing and expressed concerns about including inspection requirements.

Recommended Action: The Committee recommends that the Board initiate a rulemaking to establish provisions for remote processing. **Attachment 1** includes a copy of the recommended language that incorporates changes recommended by the Committee. Should the Board agree that such action is appropriate, the following motion could be used

Possible Motion: Initiate a rulemaking to add California Code of Regulations, Title 16, section 1717.11 [“as proposed” or “consistent with the Board’s discussion”]. Direct staff to submit the text to the Director of the Department of Consumer Affairs and the Business, Consumer Services and Housing Agency for review, and authorize the executive officer to take all necessary steps to initiate the rulemaking process, make any technical or nonsubstantive changes to the package, and set the matter for hearing, if requested. If, during the 45-day comment period, the Board does not receive any comments providing objections or adverse recommendations specifically directed at the proposed action or to the procedures followed by the Board in proposing or adopting the action, and no hearing is requested, authorize the executive officer to take all necessary steps to complete the rulemaking and adopt the proposed regulations at section 1717.11 as noticed.

New Sections 4040.6 and 4102, Related to Self-Assessment Process

Summary: Establishes the self-assessment process in statute.

Summary of Committee Discussion

Members noted support for the proposed recommended implementation activities.

Recommended Action: Maintain the process of annual updates to the self-assessment forms for review by the appropriate committee and Board prior to finalizing and updating the form. The Committee recommends that the executive officer pursue a Section 100 change to affected regulations establishing the self-assessment process. Changes will be required in the following sections of title 16, CCR: 1715, 1715.1, 1735.1, 1736.1, and 1784.

Amended Sections 4051 and 4052, Related to Standard of Care

Summary: Defines "accepted standard of care" and transitions some provisions for pharmacist-provided health care services to a standard of care practice model, including in the following areas:

1. Furnish epinephrine
2. Furnish FDA-approved or authorized medications for preventative health care services that do not require a diagnosis, including the following:
 - a. Emergency contraception
 - b. Contraception
 - c. Smoking cessation
 - d. Travel medications
 - e. Anti-viral or anti-infective medications
3. Order and interpret tests
4. Furnish medication used to reverse opioid overdose and medication used to treat substance use disorder (e.g. Naloxone)
5. Complete missing information on a prescription for a noncontrolled medication if there is evidence to support the change
6. Initiate and administer immunizations for persons three years of age and older

The law also provides that a pharmacist should not provide a service or function if the pharmacist has made a professional determination that (1) they lack sufficient education, training, or expertise, or access to sufficient patient medical information, to perform the service or function properly or safely; (2) performing or providing the service or function would place a patient at risk; or (3) pharmacist staffing at the pharmacy is insufficient to facilitate comprehensive patient care. Provisions also establish a notification requirement to a patient's primary care provider as specified.

As part of the transition to a standard of care practice model for certain pharmacist-provided health care services, some provisions of law that

established prescriptive requirements and/or required pharmacists to follow standardized procedures and protocols have been repealed, for example, former sections 4052.01, 4052.02, 4052.03, 4052.3, 4052.8, and 4052.9.

Summary of Committee Discussion

Members noted support for the proposed recommended implementation activities and considered a draft policy statement. Members suggested some formatting changes for the policy statement to improve readability. Members also considered and determined it appropriate to update the Board's CE regulations consistent with the transition to the standard of care practice model.

Public comment noted support for the transition to the standard of care practice model. Public comment also suggested that the Board's policy statement should be updated to reflect that the standard of care practice model does not apply in all instances.

Recommended Action: The Committee recommends that the executive officer pursue a Section 100 change to repeal several regulations that establish protocols and other prescriptive requirements that are deemed moot by the transition to a standard of care practice model, including the following sections of title 16, CCR: 1732.5, 1746, 1746.1, 1746.2, 1746.3, 1746.4, 1746.5, and 1747. Further, staff will remove the current online training regarding HIV PEP and PrEP.

Further, the Committee recommends that the Board release a policy statement related to the standard of care practice model. **Attachment 2** includes a copy of the recommended statement that incorporates changes recommended by the Committee. Should the Board agree, the following motion could be used:

Possible Motion: Approve the Transition to a Standard of Care Practice Model policy statement ["as proposed" or "consistent with the Board's discussion"].

Amended Sections 4081 and 4105, Related to Pharmacy Records

Summary: Updates pharmacy records requirements to specify that policies and procedures related to pharmacy personnel and pharmacy operations must also be maintained. Allows all records to be maintained in digitized format subject to specified conditions.

Summary of Committee Discussion

Members noted support for the proposed recommended implementation activity.

Public comment suggested that the Board needs to consider records that are stored "in the cloud" and the possible legal implications.

Recommended Action: Develop FAQs to clarify how to operationalize digitizing records.

Amended Section 4111, Related to Ownership Prohibitions

Summary: Updates ownership prohibition to allow for ownership of a pharmacy by a person with whom the person shares a community or other financial interest under specified conditions.

Summary of Committee Discussion

Members noted support for the proposed recommended implementation activity.

No public comments were received.

Recommended Action: Update the pharmacy license application and instructions.

Amended Sections 4112, 4113, and 4113.1, Related to Nonresident Pharmacies

Summary: Effective July 1, 2026, updates the requirements for a nonresident pharmacy to include authority for the Board to inspect a nonresident pharmacy and assess a reasonable amount to cover the Board's costs. Further, effective July 1, 2026, requires a nonresident pharmacy to designate a California-licensed pharmacist to serve as the pharmacist-in-charge. In addition, updates the medication error reporting requirements for nonresident pharmacies to clarify that only medication errors related to prescriptions dispensed to California residents must be reported.

Summary of Committee Discussion

Members noted support for the proposed recommended implementation activities.

Public comment suggested that the Board needs to provide guidance for nonresident pharmacies on what is required for licensure in California as a pharmacist. Further public comment questioned if the PIC designated for California was required to be the same individual as the PIC designated for the home state.

Recommended Action: Update the nonresident pharmacy license application and instructions. Based on changes in BPC section 4113, update the Change of PIC application forms and instructions. Update the FAQs related to AB 1286 related to medication error reporting.

Amended Section 4113, Related to Pharmacist-in-Charge, Staffing

Summary: Provides that the Pharmacist-in-Charge (PIC) shall (instead of may) make staffing decisions at the pharmacy. Requires PIC to determine appropriate

pharmacist to technician ratio, which may not exceed 1 pharmacist to 3 pharmacy technicians (1:3).

Summary of Committee Discussion

Members noted support for the proposed recommended implementation activities. Members reiterated that the PIC must establish the ratio, the ratio does not default to a 1:3.

No public comments were received.

Recommended Action: Update the FAQs related to AB 1286 related to PIC staffing authority. Update the Board provided PIC education. Further, release a policy statement related to the Role of a PIC.

Following the Committee meeting, staff worked with Chairperson Oh to develop a draft policy statement, which is included in **Attachment 3**. Should the Board agree that a policy statement is appropriate, the following motion could be used:

Possible Motion: Approve the Role of the Pharmacist-in-Charge policy statement ["as proposed" or "consistent with the Board's discussion"].

Amended Section 4113.6, Related to Chain Community Pharmacies

Summary: Requires a chain community pharmacy to post, in a prominent place for pharmacy personnel, a notice that provides information on how to file a complaint with the Board.

Summary of Committee Discussion

Members noted support for the proposed recommended implementation activity.

No public comments were received.

Recommended Action: Refer the development of a sample notice for posting to the Communication and Public Education Committee.

Amended Section 4115, Related to Pharmacy Technicians

Summary: Clarifies the authorized duties of a pharmacy technician, increases the pharmacist to pharmacy technician ratio, and establishes authority for pharmacy technicians to perform specified duties outside of a licensed pharmacy. Specified duties include performing compounding and administering COVID and flu immunizations, both of which must occur under the direct supervision and control of a pharmacist.

Summary of Committee Discussion

Members noted support for the proposed recommended implementation activity.

Public comment spoke in support of the actions taken by the Board related to immunizations and suggested other areas where a pharmacy technician may be working outside of a pharmacy, including a hospital setting. Public comment suggested this information is important to highlight in an FAQ. Public comment also spoke in support of the expanding role of a pharmacy technician and highlighted the importance of the PTAC.

Recommended Action: Update the FAQs related to AB 1286 reflecting the changes to pharmacy technician authorizations.

Amended Section 4200.5, Related to Retired Pharmacist License

Summary: Establishes provisions for an individual to restore their retired pharmacist license under specified conditions.

Summary of Committee Discussion

Members noted support for the proposed recommended implementation activity.

Recommended Action: Develop a standardized request form that can be used to facilitate collection of information and fees.

New Section 4317.6, Related to Mail Order Pharmacies

Summary: Establishes provisions to allow the Board to issue fines for up to \$100,000 under specified conditions.

Summary of Committee Discussion

Members noted support for the proposed recommended implementation activity.

Recommended Action: Include as part of the annual citation and fine presentation, citations issued under the new authority.

Amended Section 4400, Related to Fees

Summary: Establishes authority for the Board to waive the application and renewal fee for a pharmacy providing in-person patient care services in a medically underserved area, as defined.

Summary of Committee Discussion

Members noted support for the proposed recommended implementation activity.

Recommended Action: Update the pharmacy application and instructions.

Amended Section 4118.5, High Risk Patients

Summary: Establishes a requirement for a pharmacist at a hospital pharmacy to obtain an accurate medication profile for each high-risk patient upon discharge (in addition to upon admission) under specified conditions.

Summary of Committee Discussion

Members did not discuss this provision during the meeting but did receive public comment on the importance of the change.

Recommended Action: Provide education on the provisions. Consider scheduling a presentation at a future Committee meeting on patient outcomes.

c. Summary of Discussion of California Code of Regulations, Title 16, Section 1793.8, Related to Technicians in Hospitals with Clinical Pharmacy Programs, Including Possible Discussion and Action to Initiate a Rulemaking to Amend Section 1793.8

Relevant Law

[BPC section 4038](#) defines “pharmacy technician” to mean an individual who assists a pharmacist in a pharmacy in the performance of his or her pharmacy related duties, as specified in BPC section 4115.

[BPC section 4115](#) specifies that a pharmacy technician may perform packaging, manipulative, repetitive, or other nondiscretionary tasks only while assisting, and while under the direct supervision and control of, a pharmacist. Further, this section provides that in a health care facility licensed under subdivision (a) of section 1250 of the Health and Safety Code, a pharmacy technician's duties may include any of the following:

- Packaging emergency supplies for use in the health care facility and the hospital's emergency medical system or as authorized under BPC section 4119.
- Sealing emergency containers for use in the health care facility.
- Performing monthly checks of drug supplies stored throughout the health care facility.

[Title 16, CCR section 1793.2](#) specifies that the term “nondiscretionary tasks” as used in BPC section 4115 includes:

- Removing the drug from stock
- Counting, pouring, or mixing pharmaceuticals
- Placing the product into a container
- Affixing labels to the container
- Packaging and repackaging

[BPC section 4118.5](#) provides authority for a pharmacy technician to perform the task of obtaining an accurate medication profile or list for a high-risk patient under specified conditions.

[Title 16, CCR section 1793.8](#) establishes provisions for a general acute care hospital (as defined in subdivision (a) of Health and Safety Code section 1250) that has an ongoing clinical pharmacy program to allow a pharmacy technician to check the work of another pharmacy technician in connection with the filling of floor and ward stock and unit dose distribution systems under specified conditions.

Background

Beginning in 2022, the Licensing Committee began a comprehensive review of the authorized duties of a pharmacy technician. The Committee's efforts included conducting listening sessions and a pharmacy technician summit. At that time, the listening sessions focused primarily on the community pharmacy setting. Following analysis and consideration by the Board, the Board sought changes to expand the authorized duties of a pharmacy technician. These expanded duties primarily focused on duties a pharmacy technician performs in the outpatient or community pharmacy setting.

During the June 2025 Committee meeting, members received presentations from several hospitals describing the important roles pharmacy technicians play in the inpatient hospital setting. Discussion also suggested that expanding the role of pharmacy technicians in the hospital setting could support expansion of pharmacist clinical services. Further discussion contemplated if the Board should consider taking an approach that deferred to an institution's policies and procedures to define the authorized duties of a pharmacy technician.

Summary of Committee Discussion

Continuing its work in assessing authorized duties for pharmacy technicians, the Committee continued to discuss proposed changes to the authorized duties established in section 1793.8, and considered proposed regulation language. Members noted that the proposal transitions to a model that defers to the PIC's determination and hospital's policies and procedures to determine the authorized duties of a pharmacy technician in the inpatient hospital setting.

Members noted agreement with the proposed regulation text and spoke in support of separately retaining the language related to the "tech check tech" provisions.

Public comment spoke in support of the proposed regulation language, noting that it allows flexibility especially as the hospital practice model changes.

Attachment 4 includes the proposed language recommended by the Committee. Should the Board agree with the Committee's recommendation, the following motion could be used:

Possible Motion: Initiate a rulemaking to amend California Code of Regulations, Title 16, section 1793.8 ["as proposed" or "consistent with the Board's discussion"]. Direct staff to submit the text to the Director of the Department of Consumer Affairs and the Business, Consumer Services and Housing Agency for review, and authorize the executive officer to take all necessary steps to initiate the rulemaking process, make any technical or nonsubstantive changes to the package, and set the matter for hearing, if requested. If, during the 45-day comment period, the Board does not receive any comments providing objections or adverse recommendations specifically directed at the proposed action or to the procedures followed by the Board in proposing or adopting the action, and no hearing is requested, authorize the executive officer to take all necessary steps to complete the rulemaking and adopt the proposed regulations at section 1793.8 as noticed.

d. Summary of Discussion of Pharmacist to Pharmacy Technician Ratio in the Inpatient Setting, Including Possible Discussion and Action to Initiate a Rulemaking to Amend California Code of Regulations, Title 16, Section 1793.7

Relevant Law

[BPC section 4115](#) establishes the general conditions under which a pharmacy may use a pharmacy technician. The section provides that the ratio of pharmacists to pharmacy technicians established in subdivision (g) is applicable to all practice settings, except for an inpatient of a licensed health facility, a patient of a licensed home health agency, an inmate of a correctional facility of the Department of Corrections and Rehabilitation, and for a person receiving treatment in a facility operated by other specified state departments.

[Title 16, CCR section 1793.7](#) establishes a ratio of not less than one pharmacist on duty to a total of two pharmacy technicians on duty for the preparation of a prescription for an inpatient of a licensed health facility and for a patient of a licensed home health agency.

Background

In 2024, the Licensing Committee released a survey related to the pharmacist to pharmacy technician ratio. The results of the survey were discussed during the July 2024 Licensing Committee meeting. The survey results differentiated the results between the institutional (i.e., hospital) and noninstitutional (i.e., community) settings.

Following discussion of the survey results, the Board included as part of its 2025 Sunset Oversight Review Report a recommended statutory change to increase the ratio in the noninstitutional setting. During the June 2025 Licensing Committee meeting, members initiated discussion on the current pharmacist to pharmacy technician ratio in the institutional setting. During this discussion, members and

public comment suggested that the Board should consider providing greater flexibility for hospitals to establish the appropriate pharmacist to pharmacy technician ratio.

Summary of Committee Discussion

During the meeting, members continued their discussion on the ratio established in 16 CCR section 1793.7. Members considered draft regulation language to provide greater flexibility for the pharmacist to pharmacy technician ratio in the hospital setting. The approach offered will allow the PIC to determine the appropriate ratio.

Members noted support for the proposed regulation. Public comment suggested that there may be a need to further clarify the regulation language to specify whether it applies only to discharge prescriptions or to orders for administration. [Following the meeting, it was determined that additional clarification was not necessary as the regulation refers to preparation of a prescription.]

Other public comment spoke in support of the proposed regulation language noting that it allows flexibility especially as the hospital practice model changes.

Attachment 5 includes the proposed language recommended by the Committee. Should the Board agree with the Committee's recommendation, the following motion could be used:

Possible Motion: Initiate a rulemaking to amend California Code of Regulations, Title 16, section 1793.7 ["as proposed" or "consistent with the Board's discussion"]. Direct staff to submit the text to the Director of the Department of Consumer Affairs and the Business, Consumer Services and Housing Agency for review, and authorize the executive officer to take all necessary steps to initiate the rulemaking process, make any technical or nonsubstantive changes to the package, and set the matter for hearing, if requested. If, during the 45-day comment period, the Board does not receive any comments providing objections or adverse recommendations specifically directed at the proposed action or to the procedures followed by the Board in proposing or adopting the action, and no hearing is requested, authorize the executive officer to take all necessary steps to complete the rulemaking and adopt the proposed regulations at section 1793.7 as noticed.

e. Summary of Discussion of Proposal to Establish Definitions for Pharmacies Based on Business Model

Relevant Law

[BPC section 4037](#) defines a "pharmacy" as an area, place, or premises licensed by the Board in which the profession of pharmacy is practiced and where

prescriptions are compounded. "Pharmacy" includes, but is not limited to, any area, place, or premises described in the license issued by the Board wherein controlled substances, dangerous drugs, or dangerous devices are stored, possessed, prepared, manufactured, derived, compounded, or repackaged, and from which the controlled substances, dangerous drugs, or dangerous devices are furnished, sold, or dispensed at retail. The definition also exempts some facilities and drug storage areas.

Background

Generally, the requirements for pharmacies apply equally among a variety of business models, unless otherwise specified. This approach allows for broad regulation and requirements yet can become challenging when business models vary yet requirements many times do not. Within existing law there are several instances where a more specific definition is referenced, but only when applying to a specific provision of the law.

As an example, Pharmacy Law does not currently include a general definition of "chain community pharmacy." Rather, in specified sections of statute and regulation, the law refers to BPC section 4001 for the definition. **(Note:** BPC section 4001 provides, "For the purposes of this subdivision, a 'chain community pharmacy' means a chain of 75 or more stores in California under the same ownership, and an 'independent community pharmacy' means a pharmacy owned by a person or entity who owns no more than four pharmacies in California.")

As another example, Pharmacy Law sometimes refers to applicability of a requirement to "outpatient pharmacies" (see, e.g., BPC section 4076 (a)(11)(B)). In this context, the Board interprets this to mean pharmacies that provide medications to consumers outside of an inpatient setting. However, such references may cause confusion as Pharmacy Law and regulations continue to change.

Different jurisdictions nationally have taken varying approaches, with some jurisdictions (such as Texas) issuing separate licenses for different classes of pharmacy licenses. Nevada issues a [single pharmacy license](#) that covers a variety of different types of business models. Nevada requires disclosure of the types of services.

Summary of Committee Discussion

During the meeting, members discussed the issue and considered if it would be appropriate to establish definitions that reflect various pharmacy business models. Members noted that refined definitions could allow for better data on services provided as well as provide better transparency for consumers. Members generally spoke in support of providing clarity through definitions without establishing new license types. Members noted the benefits to

consumers with an increased understanding of a pharmacy's business model (e.g., closed door versus specialty, etc.) Members noted that to implement either, change to statute or regulation would be necessary and noted that establishing definitions may allow for more precise regulation.

Public comment provided a history on licensing programs for a health system. Public comment suggested there is some confusion in the use of some terms that lack definition.

The Committee did not act on this issue and will continue its discussion, including development of possible definitions of the various business models.

f. Summary of Discussion of Infusion Center Pharmacies and Possible Changes to Pharmacy Law to Create a New Licensing Program

Relevant Law

[BPC section 4028](#) defines “licensed hospital” as an institution, place, building, or agency that maintains and operates organized facilities for one or more persons for the diagnosis, care, and treatment of human illnesses to which persons may be admitted for overnight stay, and includes any institution classified under regulations issued by the State Department of Public Health as a general or specialized hospital, as a maternity hospital, or as a tuberculosis hospital.

[BPC section 4029](#) states that “hospital pharmacy” means and includes a pharmacy, licensed by the Board, located within any licensed hospital, institution, or establishment that maintains and operates organized facilities for the diagnosis, care, and treatment of human illnesses to which persons may be admitted for overnight stay and that meets all of the requirements of this chapter and the rules and regulations of the Board. The section further establishes that a hospital pharmacy may include a pharmacy located in any physical plant that is regulated under the license of a general acute care hospital under specified conditions. Further, this section also defines a “hospital satellite compounding pharmacy” as an area licensed by the Board to perform sterile compounding that is separately licensed by the Board to perform that compounding and is located outside of the hospital in another physical plant that is regulated as a general acute care hospital.

[BPC section 4037](#) defines a “pharmacy” as an area, place, or premises licensed by the Board in which the profession of pharmacy is practiced and where prescriptions are compounded. “Pharmacy” includes, but is not limited to, any area, place, or premises described in the license issued by the Board wherein controlled substances, dangerous drugs, or dangerous devices are stored, possessed, prepared, manufactured, derived, compounded, or repackaged, and from which the controlled substances, dangerous drugs, or dangerous

devices are furnished, sold, or dispensed at retail. The definition also exempts some facilities and drug storage areas.

Background

Infusion center pharmacies are not separately defined in Pharmacy Law. Such pharmacies fall within the definition established in BPC section 4037 and may be operated by a community pharmacy or hospital pharmacy. Infusion center pharmacies encompass pharmacies that provide medications for infusions at a health care facility. Generally, these medications are administered via intravenous infusion to a patient by a health care provider.

The Board has received comments that the Board's current requirements for pharmacies create barriers to patient care for pharmacies that act as infusion pharmacies.

Summary of Committee Discussion

During the meeting, the Committee considered this issue and requested input from stakeholders on the perceived barriers patients face when receiving care from infusion pharmacies. Members stated that clarity would be helpful but questioned if a separate license is necessary. Members requested that stakeholders provide written comments in advance of the Board meeting, describing perceived barriers caused by the Board's current regulation of infusion center pharmacies.

Public comment suggested that a new license type is not needed and cautioned that the Board needs to be thoughtful with its language because infusion may not occur in a pharmacy. Other public comment suggested that a license should match the practice provided and further suggested that some requirements such as labeling requirements, may not be necessary for infusion centers.

The Committee did not act on this issue and is seeking guidance from the Board. The Committee will seek a presentation at a future meeting and will likely consolidate this discussion with the prior agenda item related to pharmacy business models.

g. Summary of Discussion of Application Requirements for Advanced Practice Pharmacist Licensure, Including Possible Discussion and Action to Initiate a Rulemaking to Amend California Code of Regulations, Title 16, Section 1730.1

Relevant Law

[BPC section 4016.5](#) defines Advanced Practice Pharmacist (APH) as a licensed pharmacist who has been recognized by the Board pursuant to BPC section 4210. Such an individual is entitled to practice advanced practice pharmacy as defined on BPC section 4052.6.

[BPC section 4052.6](#) establishes the general scope of practice for an APH to include

1. Perform patient assessments.
2. Order and interpret drug therapy-related tests.
3. Refer patients to other health care providers.
4. Participate in the evaluation and management of diseases and health conditions in collaboration with other health care providers.
5. Initiate, adjust, or discontinue drug therapy.

BPC section 4210 establishes the requirements for recognition as an APH, which requires an individual to satisfy two of three specified criteria, including providing clinical services to patients for at least one year under a collaborative practice agreement (CPA) or protocol with a physician, APH, pharmacist practicing collaborative drug therapy management, or health system.

[16 CCR section 1730.1](#) further defines the application requirements for APH licensure. Subdivision (a)(3) further specifies the acceptable experience that may be earned under a CPA or protocol. The subdivision specifically provides that the experience earned under a CPA must include initiating, adjusting, modifying, or discontinuing drug therapy of patients.

Background

Since implementation of the Board's APH licensure program, the Board has performed post implementation review to evaluate barriers to licensure. Given the scope of practice for an APH expands beyond initiating, adjusting, and discontinuing therapy, it may be appropriate to consider if changes to the requirements in 16 CCR section 1730.1(a)(3) are necessary to more accurately reflect relevant experience earned as part of a CPA in preparation for APH license.

Summary of Committee Discussion

During the meeting, members considered proposed changes to section 1730.1(a)(3). Members noted agreement with the proposed language.

Public comment spoke in support of the proposed language. Public comment also cautioned that the Board needs to be careful to not inadvertently prevent other pathways to licensure.

Attachment 6 includes the proposed language recommended by the Committee. Should the Board agree with the Committee's recommendation, the following motion could be used:

Possible Motion: Initiate a rulemaking to amend California Code of Regulations, Title 16, section 1730.1 ["as proposed" or "consistent with the

Board's discussion]. Direct staff to submit the text to the Director of the Department of Consumer Affairs and the Business, Consumer Services and Housing Agency for review, and authorize the executive officer to take all necessary steps to initiate the rulemaking process, make any technical or nonsubstantive changes to the package, and set the matter for hearing, if requested. If, during the 45-day comment period, the Board does not receive any comments providing objections or adverse recommendations specifically directed at the proposed action or to the procedures followed by the Board in proposing or adopting the action, and no hearing is requested, authorize the executive officer to take all necessary steps to complete the rulemaking and adopt the proposed regulations at section 1730.1 as noticed.

Staff note that effective January 1, 2026, conforming changes to the title of the advanced pharmacist practitioner will also be required.

h. Summary of Discussion of Licensing Statistics

Licensing statistics for the first 3 months of FY 2025/26 (July 1, 2025 – September 30, 2025) and three year fiscal year comparison data are provided in **Attachment 7**.

During the timeframe, the Board has received 4,443 initial applications, including:

- 988 intern pharmacists
- 668 pharmacist exam applications (267 new, 401 retake)
- 73 advanced practice pharmacists
- 1,601 pharmacy technicians
- 73 community pharmacy license applications (5 chain, 68 nonchain)
- 9 sterile compounding pharmacy license applications (8 LSC, 1 NSC, 0 SCP)
- 36 nonresident pharmacy license applications
- 1 hospital pharmacy license applications

During the timeframe, the Board has received 2 requests for temporary individual applications (Military Spouses/Partners), including:

- 2 temporary pharmacy technicians

During the timeframe, the Board has received 105 requests for temporary site license applications, including:

- 57 community pharmacy license applications
- 6 sterile compounding pharmacy license applications
- 19 nonresident pharmacy license applications
- 0 hospital pharmacy license applications

During the timeframe, the Board has issued 2,865 individual licenses, including:

- 771 intern pharmacists
- 618 pharmacists
- 28 advanced practice pharmacists
- 1,324 pharmacy technicians

During the timeframe, the Board has issued 3 temporary individual applications (Military Spouses/Partners), including:

- 2 temporary pharmacy technicians
- 1 temporary pharmacist

During the timeframe, the Board has issued 120 site licenses without temporary license requests, including:

- 44 automated drug delivery systems (33 AUD, 11 APD)
- 26 community pharmacies
- 0 hospital pharmacy

During the timeframe, the Board has issued 609 temporary site licenses, including:

- 553 community pharmacies
- 5 hospital pharmacies

Public comment suggested that it may be appropriate to consider expanding entities that are eligible for a remote dispensing site pharmacy.

DEPARTMENT OF CONSUMER AFFAIRS

Title 16. Board of Pharmacy

Proposed Regulatory Language

Remote Processing

Proposal to Add CCR section 1717.11 to Division 17 of Title 16 of the California Code of Regulations to read as follows:

§1717.11 Remote Processing

- (a) A pharmacist located and licensed in the state may perform remote processing of prescriptions, from a location outside of a licensed facility, under the following conditions:
- (1) The pharmacy is responsible for ensuring all appropriate and necessary security and confidentiality provisions are in place, including compliance with HIPAA requirements, and specified in its policies and procedures.
 - (2) The pharmacist has agreed to perform remote processing and designates the space to perform such processing in a written agreement with the pharmacy. Such space shall be open for inspection by the Board consistent with the provisions of Business and Professions Code section 4008.
 - (3) The written agreement (including modifications) required in (a)(2) of this section shall be maintained, for at least three years following the pharmacist's employment, in a readily retrievable format and shall be available for inspection by the Board.
 - (4) The duties for remote processing of prescriptions shall be approved by the pharmacist-in-charge and specified in the pharmacy's policies and procedures.
 - (5) A pharmacy shall maintain a record of all the pharmacist's activities performed pursuant to this section.
- (b) For purposes of this section, "remote processing of prescriptions" does not include final product verification, supervision of pharmacy personnel, or the dispensing of a drug.

Authority cited: Sections 4005 and 4036, Business and Professions Code.

Reference: Sections 4005, 4008 and 4036, Business and Professions Code.

Attachment 2

Summary

Under provisions of Assembly Bill 1503 (Berman, Chapter 196, Statutes of 2025), certain **pharmacist-provided** patient care services are transitioning to a standard of care practice model. The California State Board of Pharmacy wishes to provide licensees with information on its policy related to this transition.

Background

This transition builds upon efforts included in Assembly Bill 1286 (Haney, Chapter 470, Statutes of 2023) that underscore pharmacist autonomy in exercising professional judgement, as well as the Board's evaluation of opportunities for improved patient care through a transition to a standard of care practice model for pharmacists.

AB 1503 provides further progression of pharmacist-provided patient care services initially established under prior law, including Senate Bill 493 (Hernandez, Chapter 469, Statutes of 2013), which took a largely prescriptive approach and required pharmacists to follow a standardized protocol that specified the practice requirements to provide the service.

Impacted Provisions

Under the new changes in AB 1503, prescriptive requirements are removed in favor of a standard of care approach whereby pharmacists may authorize the initiation of a prescription, pursuant to Business and Professions Code (BPC) section 4052, 4052.1, 4052.2, or 4052.6, and otherwise provide clinical advice, services, information, or patient consultation, as set forth in Chapter 9 of Division 2 of the BPC, if certain conditions are met, including a requirement that the pharmacist provide the service or activity consistent with the "accepted standard of care" (i.e., the degree of care a prudent and reasonable California-licensed pharmacist, with similar education, training, experience, resources, and setting, would exercise in a similar situation). (See [Stats. 2025, Ch. 196, Sec. 12 \(AB 1503\)](#), effective January 1, 2026.)

As amended by AB 1503, BPC section 4052 makes clear, however, that a pharmacist is not obligated to perform or provide a service or function authorized by that section if the pharmacist has made a professional determination that any of the following apply:

(1) The pharmacist lacks sufficient education, training, or expertise, or access to sufficient patient medical information, to perform the service or function properly or safely.

(2) Performing or providing the service or function would place a patient at risk.

(3) Pharmacist staffing at the pharmacy is insufficient to facilitate comprehensive patient care.

(See [Stats. 2025, Ch. 196, Sec. 13 \(AB 1503\)](#), effective January 1, 2026.)

To promote and to respect the standard of care practice model, the Board does not intend to provide guidance on how pharmacists are to perform the functions authorized in BPC section 4052. Rather, it will be the responsibility of each pharmacist to determine whether they have sufficient education, training, experience, resources, and setting to perform authorized duties.

As an example, as amended by AB 1503, BPC section 4052(a)(10)(A) authorizes pharmacists to furnish FDA-approved or authorized medications as part of preventative health care services that do not require a diagnosis, including any of the following:

- emergency contraception,
- contraception,
- smoking cessation,
- travel medication,
- anti-viral or anti-infective medications.

(See [Stats. 2025, Ch. 196, Sec. 13 \(AB 1503\)](#), effective January 1, 2026.) As practicing pharmacists, you will determine what is the most appropriate therapy for patients in need of these services. In addition, pharmacists will be expected to provide the services consistent with the accepted standard of care, and in accordance with the other conditions set forth in BPC section 4051(c). (See [Stats. 2025, Ch. 196, Sec. 12 \(AB 1503\)](#), effective January 1, 2026.)

Pharmacist Practice Transition

This change for pharmacist practice is consistent with pharmacist education, training, and experience and removes barriers to care patients face. The Board understands this will bring many questions, but expects that pharmacists will rely on their professional judgement when providing these patient care services,

similar to the approach used in so many other aspects of pharmacy practice, such as corresponding responsibility. The Board looks forward to closing gaps in patient access that currently exist within our healthcare environment that this transition to a more robust standard of care practice model will achieve.

What is Not Covered

The Board notes that the standard of care practice model does not apply to all areas of practice. As an example, a pharmacist that is compounding must comply with all Board regulations, and all state and federal laws, applicable to compounding. Further, the standard of care practice model does not include operational issues.

Draft 10.15.2025

Attachment 3

Draft Policy Statement: The Role of the PIC

Highlight

The California State Board of Pharmacy, recognizing the vital role a pharmacist-in-charge (PIC) plays in providing safe and effective patient care services, secures additional legal changes to underscore the autonomy of PICs.

Background

Every pharmacy must designate a PIC to serve as the supervisor or manager responsible for ensuring the pharmacy's compliance with all state and federal laws and regulations pertaining to the practice of pharmacy.¹ The PIC has responsibility for the daily operation of the pharmacy, and the pharmacy owner must vest the PIC with adequate authority to assure compliance with the laws governing the operation of a pharmacy.² Courts have confirmed a "strict liability" reading of the PIC's responsibilities in certain contexts.³

The Board wishes to remind licensees and other stakeholders about the important role of the PIC, and call attention to significant legal and policy changes the Board has undertaken, in response to comments received, to address identified barriers to a PIC achieving the level of autonomy necessary to fulfill the legal and ethical obligations inherent in a PIC position.

Such changes include:

1. Updating the Board's unprofessional conduct codes to explicitly state that actions or conduct that would subvert the effort of a PIC to comply with laws and regulations, exercise professional judgment, or make determinations about adequate staffing levels to safely fill prescriptions of the pharmacy or provide other patient care services in a safe and competent manner is unprofessional conduct.⁴

¹ See Business and Professions Code (BPC) sections 4036.5 and 4113.

² See California Code of Regulations, title 16, section 1709.1.

³ See *Sternberg v. California State Bd. of Pharmacy* (2015) 239 Cal.App.4th 1159, holding that BPC section 4081, understood in combination with a PIC's responsibility for pharmacy compliance and the obligation to protect the public, did not require "knowledge" to impose discipline for violations of inventory management, such that "strict liability" is proper in this context.

⁴ See BPC section 4301(w).

2. Updating the regulations related to PIC eligibility to require completion of a Board-provided Pharmacist-in-Charge Overview and Responsibility training course prior to appointment as a PIC.⁵

Recent Changes

Under provisions of Assembly Bill 1503 (Berman, Chapter 196, Statutes of 2025) several additional changes were made to reinforce the autonomy of decision-making of a PIC. Changes include:

1. The PIC **shall** make staffing decisions to ensure sufficient personnel are present in the pharmacy to prevent fatigue, distraction, or other conditions that may interfere with a pharmacist's ability to practice competently and safely.⁶
2. The PIC, using their independent professional judgment, shall determine the appropriate pharmacist-to-technician ratio, not to exceed a maximum ratio of 1:3.⁷

In addition, based on concerns that a PIC of a nonresident pharmacy has not established minimum competency with California law yet is responsible for operational and legal compliance with California pharmacy law, AB 1503 requires that, beginning July 1, 2026, a nonresident pharmacy must identify a California-licensed pharmacist employed and working at the nonresident pharmacy to serve as the PIC.⁸ Note: The individual designated as the PIC for a nonresident pharmacy must be fully vested with all authority necessary to ensure operational compliance to meet requirements established in California law. The Board further notes that, as a policy matter, it will not require the individual designated as the PIC for California operations to be the PIC on record for the resident state.

Additional Information

BPC section 4306.6 requires the Board to consider a report made by the PIC, regarding an actual or suspected violation of pharmacy law by another person, as a mitigating factor in a disciplinary action against the PIC.

⁵ See California Code of Regulations, title 16, section 1709.1, subdivisions (a) and (e).

⁶ See Stats. 2025, Ch. 196, Sec. 33 (AB 1503), effective January 1, 2026. (**Note:** Prior to this change, BPC section 4113(c)(2) stated that the PIC **may** make staffing decisions.)

⁷ See Stats. 2025, Ch. 196, Sec. 33 and 36 (AB 1503), effective January 1, 2026.

⁸ See Stats. 2025, Ch. 196, Sec. 32 (AB 1503), effective January 1, 2026.

To assist prospective PICs of nonresident pharmacies to learn about California pharmacist licensure requirements, the Board has information available [here](#). The Board highlights that the California Practice Standards and Jurisprudence Examination is only administered on dedicated days; see the Board's [website](#) for the schedule of test dates.

Department of Consumer Affairs

Title 16. Board of Pharmacy

Technicians in Hospitals with Clinical Pharmacy Programs

Proposal to Amend CCR section 1793.8 of Division 17 of Title 16 of the California Code of Regulations to read as follows:

§ 1793.8. Technicians in Hospitals with Clinical Pharmacy Programs.

(a) In addition to the duties described in Business and Professions Code section 4115 and section 1793.2 of this division, A a general acute care hospital, as defined in Health and Safety Code section 1250(a), that has an ongoing clinical pharmacy program, may allow pharmacy technicians to perform such other nondiscretionary tasks, as determined appropriate by the hospital's pharmacist-in-charge and set forth in the hospital's policies and procedures, under the following conditions. ~~to check the work of other pharmacy technicians in connection with the filling of floor and ward stock and unit dose distribution systems for patients admitted to the hospital whose orders have previously been reviewed and approved by a licensed pharmacist.~~

(1) Only inpatient hospital pharmacies as defined in Business and Professions Code section 4029(a) that maintain a clinical pharmacy services program as described in Business and Professions Code section 4052.1 may have a technician performing such tasks. ~~checking technician program as described.~~ The pharmacy shall have on file a description of the clinical pharmacy program ~~prior to initiating a technician checking technician program.~~

~~(1) This section shall only apply to acute care inpatient hospital pharmacy settings.~~

(2) Hospital pharmacies that have a technician performing the tasks ~~checking technician program~~ shall deploy pharmacists to the inpatient care setting to provide clinical services.

(b) Compounded or repackaged products must have been previously checked by a pharmacist and then may be used by the technician to fill unit dose distribution systems, and floor and ward stock.

(c) To ensure quality patient care and reduce medication errors, programs that use pharmacy technicians to check the work of other pharmacy technicians pursuant to this section must include the following components:

(1) The overall operation of the program shall be the responsibility of the pharmacist-in-charge.

(2) The program shall be under the direct supervision of a pharmacist and the parameters for the direct supervision shall be specified in the facility's policies and procedures.

(3) The pharmacy technician who performs the checking function has received specialized and advanced training as prescribed in the policies and procedures of the facility.

(4) To ensure quality there shall be ongoing evaluation of programs that use pharmacy technicians to check the work of other pharmacy technicians.

DEPARTMENT OF CONSUMER AFFAIRS

Title 16. Board of Pharmacy

Requirements for Pharmacies Employing Pharmacy Technicians

Proposal to Amend CCR section 1793.7 of Division 17 of Title 16 of the California Code of Regulations to read as follows:

§ 1793.7. Requirements for Pharmacies Employing Pharmacy Technicians.

(a) Except as otherwise provided in section 1793.8, any function performed by a pharmacy technician in connection with the dispensing of a prescription, including repackaging from bulk and storage of pharmaceuticals, must be verified and documented in writing by a pharmacist. Except for the preparation of prescriptions for an inpatient of a hospital and for an inmate of a correctional facility, the pharmacist shall indicate verification of the prescription by initialing the prescription label before the medication is provided to the patient.

(b) Pharmacy technicians must work under the direct supervision of a pharmacist and in such a relationship that the supervising pharmacist is fully aware of all activities involved in the preparation and dispensing of medications, including the maintenance of appropriate records.

(c) A pharmacy technician must wear identification clearly identifying him or her as a pharmacy technician.

(d) Any pharmacy employing or using a pharmacy technician shall develop a job description and written policies and procedures adequate to ensure compliance with the provisions of Article 11 of this Chapter, and shall maintain, for at least three years from the time of making, records adequate to establish compliance with these sections and written policies and procedures.

(e) A pharmacist shall be responsible for all activities of pharmacy technicians to ensure that all such activities are performed completely, safely and without risk of harm to patients.

(f) For the preparation of a prescription for an inpatient of a licensed health facility and for a patient of a licensed home health agency, the pharmacist to pharmacy technician ratio shall be established by the pharmacist-in-charge. not be less than one pharmacist on duty for a total of two pharmacy technicians on duty. Pursuant to Business and Professions Code section 4115(g)(1), this ratio shall not apply to the preparation of a prescription for an inmate of a correctional facility of the Department of Youth Authority or the Department of

Corrections and Rehabilitation, or for a person receiving treatment in a facility operated by the ~~State Department of Mental Health~~ State Hospitals, the State Department of Developmental Services, or the Department of Veterans Affairs.

DEPARTMENT OF CONSUMER AFFAIRS

Title 16. Board of Pharmacy

Application Requirements for Advanced Practice Pharmacist Licensure

Proposal to Amend CCR section 1730.1 of Division 17 of Title 16 of the California Code of Regulations to read as follows:

§ 1730.1. Application Requirements for Advanced Practice Pharmacist Licensure.

(a) For purposes of Business and Professions Code section 4210, an applicant for advanced practice pharmacist licensure must satisfy two of the following subsections.

(1) Demonstrate possession of a current certification as specified in Business and Professions Code section 4210, subdivision (a)(2)(A)(i), by providing either:

(A) A copy of the certification award that includes the name of the applicant pharmacist, the area of specialty and date of completion, or

(B) A letter from the certification program confirming the award of the certification that includes the name of the applicant pharmacist, the area of specialty and the date of completion.

(2) Demonstrate completion of a postgraduate residency earned in the United States through an accredited postgraduate institution as specified in Business and Professions Code section 4210, subdivision (a)(2)(A)(ii), by providing either:

(A) A copy of the residency certificate awarded by the postgraduate institution that includes the name of the applicant pharmacist, the area of specialty, and dates of participation and completion, or

(B) A letter of completion of a postgraduate residency, signed by the dean or residency program director of the postgraduate institution and sent directly to the board from the postgraduate institution, that lists the name of the applicant pharmacist, the area of specialty, and the dates of participation and completion. For an applicant who cannot satisfy this documentation requirement, the board may, for good cause shown, grant a waiver for this subsection.

(3) Demonstrate that experience earned under a collaborative practice agreement or protocol, as required by Business and Professions Code section 4210, subdivision (a)(2)(A)(iii), has been earned within 10 years of the time of application for advanced practice pharmacist licensure. Additionally, the one year of experience must include no fewer than 1,500 hours of experience providing clinical services to patients. ~~The experience earned under a collaborative practice agreement or protocol must include initiating, adjusting, modifying or discontinuing drug therapy of patients as authorized by law.~~ An applicant shall demonstrate possession of experience by providing both of the following:

(A) A written statement from the applicant attesting under penalty of perjury that he or she has:

(i) Earned the clinical experience within the required time frame; and

(ii) Completed the required number of hours of experience providing clinical services to patients, as specified in subsection (a)(3).

(I) The applicant shall provide a copy of the collaborative practice agreement or protocol.

(II) If a copy of the collaborative practice agreement or protocol is not available, the applicant shall provide a description of the collaborative practice agreement or protocol, including examples of the clinical services the applicant provided to patients.

(B) A written statement from the supervising practitioner, program director or health facility administrator attesting under penalty of perjury that the applicant has completed at least 1,500 hours of experience providing clinical services to patients. For an applicant who cannot satisfy this documentation requirement, the board may, for good cause shown, grant a waiver for this subsection.

(b) The experience an applicant offers to demonstrate compliance with one of the three criteria in subsection (a) above may not also be used to satisfy another of the criteria. However, if, as a condition of completion of one of the required criteria, fulfillment of a second criterion is also required, that completion shall satisfy this section.
