DRAFT Surgical Clinic Self-Assessment

Business and Professions Code sections 4102 and 4192 require **the consulting pharmacist** of a surgical clinic licensed under section 4190 of the Business and Professions Code to complete a self-assessment of the surgical clinic's compliance with federal and state laws. **The assessment shall be performed by July 1 of every odd-numbered year. The primary purpose of the self-assessment is to promote compliance through self-examination and education, and the self-assessment must assess the clinic's compliance with current laws and regulations and include information on compounding practices.**

Please mark the appropriate box (Yes, No, or N/A) for each question. If "No," enter an explanation in the "Corrective Action Plan" section. If the specific legal requirement referenced in the question clearly and objectively does not apply to your surgical clinic, then mark the box "N/A". If more space is needed, you may add additional sheets. The self-assessment must be completed in its entirety. It may be completed online and printed, initialed, and signed (use original signatures or digital signatures that comply with California Code of Regulations, title 16, section 1700). The completed form shall be kept on file in the surgical clinic and made available to the Board upon request. A new self-assessment form must be filled out each time the self-assessment process is required to be completed; do not use or copy from a previous self-assessment form. Each self-assessment must be kept on file in the surgical clinic for three years after it is performed. Further, as part of the renewal process of every odd-numbered year, the most recent self-assessment form completed shall also be provided to the Board.

Notes:

- This self-assessment is not an all-inclusive compilation of all laws and regulations that may apply to surgical clinics licensed under section 4190 of the Business and Professions Code. The professional director is responsible for the safe, orderly, and lawful provision of pharmacy services at the clinic, regardless of whether such laws or regulations are referenced on this self-assessment.
- In addition to completing this form, the consulting pharmacist must certify in writing quarterly that the clinic is, or is not, operating in compliance with Article 14 of Chapter 9 of Division 2 of the Business and Professions Code. Each completed written certification shall be kept on file in the clinic for three years and shall include recommended corrective actions, if appropriate. Further, as part of the renewal process the consulting pharmacist shall certify compliance with the quarterly inspections as required in section 4192.
