

BE AWARE & TAKE CARE:
Talk to your pharmacist!

The Script

CALIFORNIA STATE BOARD OF PHARMACY Summer 2016

Board of Pharmacy Launches Redesigned Website

The Board of Pharmacy has a new look online! The redesigned website was launched in June with a clean layout and user-friendly tools for finding news and information about the board as well as links to other agencies and organizations.

The home page features new tabs to access the Consumers, Applicants, Licensees and About Us landing pages. A search box in the top right corner takes

visitors to specific topics quickly. A special new feature provided by Google can now translate the full site into almost 100 different languages.

Board members Deborah Veale and Dr. Ramón Castellblanch worked with webmaster Victor Perez to develop the new design. Check it out at www.pharmacy.ca.gov.

President's Message

By Amy Gutierrez, PharmD
President, Board of Pharmacy

Drug overdoses have become one of the leading causes of accidental death in the United States, with opioid addiction driving this epidemic. According to the CDC, over 259 million prescriptions were written for opioids in 2012 - more than enough to give every American his or her own bottle of pills.

Earlier this year, the CDC issued new prescribing guidelines for the use of opioids in chronic pain, focusing on the use of non-opioid therapy for chronic pain and promoting the use of lower opioid treatment doses to reduce risk. As pharmacists, we play an important role in promoting the safe prescribing of opioids and promoting communication to the healthcare community and our patients of the inherent risks associated with the long-term use of opioids.

One of the available tools to identify patients who may be at risk is California's prescription drug monitoring program - CURES. The CURES system is readily available to all pharmacists who have registered, allowing for review of

patient-specific prescription dispensing history for Schedule II-IV drugs from all California-licensed pharmacies. This access helps identify patients at risk and is a critical tool for pharmacists who dispense controlled substance prescriptions.

Recent legislation required that all pharmacists with active licenses apply for registration in CURES by July 1, 2016. Through statewide efforts to maximize awareness, education and active participation by pharmacists, almost 95 percent of all California licensed pharmacists were registered to access the CURES program by this past July. Not only are pharmacists registered - we are using the CURES system, with almost 500,000 patient activity reports accessed monthly by pharmacists.

Active access to CURES reports for applicable patients is encouraged for all pharmacists, as is integration of CURES report review into daily pharmacy practice. The CURES reporting process is intuitive, and information on the use of CURES is available via link from the board's [website](#). The board has posted a "Red Flags" video to assist pharmacists in providing appropriate review of opioid prescriptions. Every pharmacist is encouraged to watch this video and walk through the various patient vignettes presented.

Over the last few years, the board has been working to develop and implement multiple major regulations that are providing California the ability to lead the nation in promoting pharmacy practice. Much of this work is nearing completion, as highlighted below:

- The board has secured

regulations creating state protocols so that pharmacists may provide nicotine replacement products and self-administered hormonal contraception to patients under their own authority. Regulations were recently approved that provide pharmacists with greater autonomy to vaccinate patients under the education and skills they have obtained as licensed pharmacists under the state protocol. In addition, the first of two advanced practice pharmacist (APP) regulations was also recently approved, paving the way for community-based pharmacist training as a route for APP qualification.

- Under final administration review are additional SB 493 regulations that allow pharmacists to provide services for travel medications and another regulation outlining qualification requirements for the new licensure category of advanced practice. Both of these are at the final stage of administration approval, with our hope that these regulations are approved and in place in the next few months.
- The board is nearing completion of its work on a major overhaul of compounding regulations for general and sterile compounding. The implementation of these regulations will represent a major effort for the board and com-

See *President's Message* Page 3

President's Message

Continued from Page 2

pounding community and hospital pharmacies.

- The board is also nearing completion of work for requirements for pharmacies to provide drug take-back services for the public, a rulemaking the board hopes to have in place by the end of 2016. This regulation relies upon the federal Drug Enforcement Administration's drug take-back requirements and establishes parameters for collection receptacles in pharmacies, hospitals and skilled-nursing facilities as well as the use of mail-back envelopes to provide

options for consumers who desire to remove unwanted medications from their homes.

- The board's Communication and Public Education Committee recently began examining the Affordable Care Act's requirements for pharmacy translations and interpreters for patients in 15 languages. Section 1557 of the Affordable Care Act forbids discrimination in health care because of race, color, national origin, age, disability and sex. This section of the act took effect July 18, 2016, and will likely result

in impact to multiple current state pharmacy regulations.

Thank you to every stakeholder who took the time to attend a board meeting or submit public comments for the multiple pending regulations that have either been approved or are pending final approval. Your participation and voice have resulted in our ability to finalize meaningful regulations that will directly affect the provision of safe care for the consumers who rely on our pharmacies.

If you have not already done so, I encourage you to attend a board meeting and provide a voice on the future of your profession.

Mark Your Calendar for Upcoming Board, Committee Meetings; CE Credit Available For Pharmacists, Pharmacy Technicians

Information regarding locations and agendas for all board and committee meetings is posted at the board's website, www.pharmacy.ca.gov, at least 10 days before each meeting.

Packets of background material with information for agenda items are available for download from the website about five days before each meeting. The agenda and meeting materials are available on the board's website.

For most meetings, pharmacists and pharmacy technicians who attend in person may be awarded six CE hours. Signing in and out on the day of the meeting will be required for CE credit.

Meetings of the California State Board of Pharmacy in 2016 are scheduled for September 22, 2016, in Southern California and October 26-27, 2016, in San Jose. Board meetings are webcast, when feasible.

Upcoming meetings of committees for 2016 are:

- Communication and Public Education Committee: December 1, 2016
- Licensing Committee: September 27, 2016

As additional meetings are scheduled, they will be posted on the board's website. Minutes of meetings also are posted online.

Protocol Enables Pharmacists to Expand Public Access to Antidote for Opioid Overdose

California pharmacists are taking a more active role in efforts to prevent deaths from opioid overdoses by increasing access to naloxone hydrochloride, a medication that reverses opioid overdose.

Authority for pharmacists to furnish naloxone was established by AB 1535 (Bloom), which was passed in 2014. The law authorized the furnishing of naloxone pursuant to a protocol developed by the Board of Pharmacy and approved by the Medical Board of California. The medication may be administered by intramuscular injection, intranasal spray or auto-injector.

The protocol, in California Code of Regulations Title 16, section 1746.3, lays out specific requirements for pharmacists to screen potential recipients and to provide training in preventing, recognizing and responding to opioid overdose and in administering naloxone. In addition, the protocol requires pharmacists to complete at least one hour of approved continuing education training on all forms of naloxone hydrochloride before furnishing the medication.

The protocol requires pharmacists to determine whether the potential recipient (A) uses illicit or prescription opioids or (B) “is in contact” with anyone who uses illicit or prescription opioids. The pharmacist also must determine whether the person to whom the drug would be administered has a known sensitivity to naloxone; if so, the pharmacist may not provide the drug.

Translated screening questions for potential recipients of naloxone whose primary language is traditional Chinese, Korean, Russian, Spanish, Tagalog or Vietnamese are available on the Board of Pharmacy website at http://www.pharmacy.ca.gov/licenses/naloxone_info.shtml.

The protocol also requires pharmacists to counsel and provide recipients with information about the medication, including “dosing, effectiveness, adverse effects, storage conditions, shelf-life, and safety.” The recipient is not permitted to waive the required consultation. The pharmacist also must provide any available information or referrals to appropriate resources to any recipient who “indicates interest in addiction treatment, recovery services, or medication disposal resources at this time.”

As members of a health care team, pharmacists may recommend that patients filling prescriptions for opioids ask

their doctors to also prescribe naloxone. Alternatively, pharmacists may on their own suggest that patients filling prescriptions for opioid medications also obtain naloxone.

If the recipient is also the person to whom the naloxone would be administered, the recipient is considered a patient for purposes of the protocol. If the patient consents, section 1746.3(c)(7) requires the pharmacist to “notify the patient’s primary care provider of any drug(s) and/or device(s) furnished, or to enter the appropriate information in a patient record system shared with the primary care provider, as permitted by the patient and the primary care provider.”

If the patient does not have a primary care provider or does not consent to notification, section 1746.3(c)(7) requires the pharmacist to “provide a written record of the drug(s) and/or device(s) furnished and advise the patient to consult an appropriate health care provider of the patient’s choice.”

The full text of California Code of Regulations section 1746.3 is available at http://www.pharmacy.ca.gov/publications/naloxone_protocol.pdf.

A fact sheet about naloxone is available on the Board of Pharmacy website at http://www.pharmacy.ca.gov/publications/naloxone_fact_sheet.pdf.

The Board of Pharmacy Prescription Drug Abuse Prevention page, including public service announcement videos, is available at http://www.pharmacy.ca.gov/consumers/rx_abuse_prevention.shtml.

Experts Warn Opioid Abusers Are Turning To Common Anti-Diarrhea Drug Loperamide

As efforts to halt opioid abuse continue, experts warn that a growing number of people who abuse painkillers are turning to an unlikely alternative: loperamide, an anti-diarrhea medicine that is widely sold over the counter as Imodium and other brands. For some who take massive doses to ease withdrawal symptoms or get high, the results can be fatal.

A recent report in the *Annals of Emergency Medicine* studied two cases of substance abusers in New York who overdosed on loperamide and died. A statement issued with the report by the American College of Emergency Physicians said that

loperamide is “safe in therapeutic doses but extremely dangerous in high doses.”

In June, the U.S. Food and Drug Administration warned that taking excessive amounts of loperamide can cause serious problems with heart rhythm and lead to death. Out of 48 cases of serious heart problems associated with loperamide that the FDA received between 1976 and 2015, more than half were reported after 2010.

Although the active ingredient in loperamide is an opioid, the medication has been approved by the FDA since 1976 to help control diarrhea. The maximum approved daily dose is 8 milligrams for over-the-counter use and 16 milligrams for prescription use.

But in a 2012 study of almost 1,300 loperamide abusers who posted in online forums, some reported taking 70 to 100 milligrams a day. Seventy percent reported taking “megadoses” to alleviate opioid withdrawal symptoms, while 25 percent said they did so in an effort to produce euphoria.

Researchers say the fatal overdoses in New York reflect a broader and growing trend of loperamide abuse. The American College of Emergency Physicians said the Upstate New York Poison Center had a seven-fold increase in calls regarding abuse or misuse of loperamide from 2011 to 2015. Meanwhile, national poison call centers reported a 71 percent increase in loperamide cases from 2011 to 2014.

“Loperamide’s accessibility, low cost, over-the-counter legal status and lack of social stigma all contribute to its potential for abuse,” said William Eggleston, a doctor of pharmacy and lead author of the *Annals of Emergency Medicine* study.

“Our nation’s growing population of opioid-addicted patients is seeking alternative drug sources with prescription opioid medication abuse being limited by new legislation and regulations,” Dr. Eggleston said. “Health care providers must be aware of increasing loperamide abuse and its under-recognized cardiac toxicity. This is another reminder that all drugs, including those sold without a prescription, can be dangerous when not used as directed.”

“Notice to Consumers” Available in Various Formats

California Code of Regulations section 1707.6 requires pharmacies to display a Notice to Consumers as specified in subsection (b). Full-size posters in English and Spanish are available to be ordered at the board’s website. Smaller versions in Chinese, Korean, Russian, Spanish, Tagalog and Vietnamese may be printed or ordered at the board’s website.

As an alternative to a printed format, Section 1707.6 allows pharmacies to display the Notice to Consumers on a video screen. The Notice to Consumers is available in video format in English and Spanish at the Board of Pharmacy’s website under “Publications for Applicants and Licensees.” Both versions can be downloaded as PowerPoint presentations.

A pharmacy also may seek approval of another format or display methodology from the Board of Pharmacy’s Executive Officer.

Section 1707.6 (a)(1)-(4) lists specific requirements for displaying the Notice to Consumers on a video screen instead of in printed form. The section requires:

- (1) The video screen is at least 24 inches, measured diagonally;
- (2) The pharmacy utilizes the video image notice provided by the Board of Pharmacy;
- (3) The text of the notice remains on the screen for a minimum of 60 seconds; and
- (4) No more than five minutes elapses between displays of any notice on the screen, as measured between the time that a one-screen notice or the final screen of a multi-screen notice ceases to display and the time that the first or only page of that notice re-displays.

Federal Group Recommends Best Practices For Making Prescription Drug Labels Accessible To Blind, Visually Impaired, Elderly Patients

Federal best practices for prescription drug containers have been developed to make it easier for people who are blind, visually impaired or elderly to access label information.

The recommended best practices were developed by a working group of consumer and drug industry advocates convened by the United States Access Board under the Food and Drug Administration Safety and Innovation Act (Public Law 112-144, 126 Stat. 993).

The working group stated that people who cannot read printed prescription labels because of visual impairment “all too often take the wrong medication, the wrong amount, at the wrong time and under the wrong instructions.” The group also noted that most people who become blind or visually impaired do so after age 60 – a time when many take multiple medications and have physical and cognitive conditions that increase the need for “safe, consistent, reliable and independent access” to drug label information.

Recommendations of the federal working group include:

- Encourage patients to communicate their needs to pharmacists.
- Follow universal patient-centered prescription drug container label standards.
- Make container labels available in audible, braille and large-print formats. Explain the choices and provide the format selected by the patient.
- Ensure that duplicate accessible labels preserve the integrity of the print prescription label.
- Subject accessible prescription labels to the same quality control processes used for print labels to ensure accuracy and patient safety.
- Maintain patient privacy (HIPPA rules) when preparing accessible drug labels.
- Keep a sufficient inventory of supplies to provide accessible labels.
- Provide drugs with an accessible label within the same time frame as would be provided to patients without visual impairments.
- Don’t impose an extra fee to cover the cost of providing an accessible drug label.
- Ensure durability of accessible label formats until the prescription expiration date.
- Select a container that best supports the type of accessible label provided.

- Ensure all required information contained on the print prescription drug label is provided in the same sequence on the accessible label.
- Include in accessible labels the information on warning labels added to the container at the pharmacist’s discretion.

A variety of methods and technologies exist to enable blind, visually impaired and elderly people to access information on prescription labels, including:

- Hard copy labels printed in large type or braille.
- Digital voice or text-to-speech recorders – “Talking bottles” that use a small electronic device attached to a drug container to read the label information aloud.
- Radio Frequency Identification Device (RFID) tags – Attaching RFID tags to drug containers that enable a dedicated device used by the patient to read the label aloud.
- Smart devices and computers equipped with electronic braille, large text and audio technology to access electronic text.

A brochure listing the best practices was issued in June 2016 by the National Council on Disability. The brochure is available at http://www.ncd.gov/sites/default/files/ADLP_508.pdf.

Additional information about the recommended best practices and a link to the working group’s [full report](https://www.access-board.gov/guidelines-and-standards/health-care/about-prescription-drug-container-labels) is available at <https://www.access-board.gov/guidelines-and-standards/health-care/about-prescription-drug-container-labels>.

Valerie Muñoz Appointed to Board

Valerie Muñoz of La Puente was appointed in July as a public member of the Board of Pharmacy by the Senate Rules Committee.

Ms. Muñoz is mayor of La Puente and has served on the City Council since 2014. She is a delegate to the California Contract Cities Association and an alternate to the League of California Cities and the Foothill Transit Authority board.

She works as a practice and human resources manager for an optometry business. She earned a master's degree in leadership and organizational studies and a bachelor's degree in organizational studies from Azusa Pacific University.

Ramón Castellblanch Leaves After 2 Terms as Public Member

Board of Pharmacy member Ramón Castellblanch, Ph.D., is leaving after two terms as a public member of the board.

Dr. Castellblanch was appointed to the board by the Senate Rules Committee in 2009 and was reappointed in 2012. He served most recently on board's Communication and Public Education Committee and the Legislation and Regulation Committee. Dr. Castellblanch previously served as the Chairperson on the Prescription Drug Abuse Subcommittee. Dr. Castellblanch was a supporter of patient-centered prescription labels, translation and interpreter services for pharmacy patients, prescription drug abuse awareness and education as well as consumer health education.

NABP Honors Stanley C. Weisser With Top Award for Distinguished Service

The National Association of Boards of Pharmacy (NABP) has presented its highest honor, the Lester E. Hosto Distinguished Service Award, to California State Board of Pharmacy Member Stanley C. Weisser.

Mr. Weisser was honored for "his strong commitment to protecting the public health and his successful advancement of higher standards and stronger oversight for sterile compounding pharmacies," the NABP said in a written statement. The award was presented at the NABP's 112th Annual Meeting May 14-17, 2016, in San Diego.

A member of the California State Board of Pharmacy since 2007, Mr. Weisser served as president from 2010 to 2015. As chairman of the SB 493 Implementation Committee, he led efforts to specify requirements for licensing advanced practice pharmacists in California and to develop three state protocols and two additional regulations to implement extended care requirements. He is an associate clinical professor

Board Re-elects All 3 Officers

Board of Pharmacy President Amy Gutierrez, Vice President Deborah Veale and Treasurer Victor Law were re-elected as officers at a board meeting on April 27.

Dr. Gutierrez joined the board in 2012. She worked at the Los Angeles County Department of Health Services since 1984 and has served as chief pharmacy officer and director of pharmacy since 2006. Dr. Gutierrez earned a doctorate in pharmacy from the University of Southern California, School of Pharmacy.

Ms. Veale has served on the board since 2010. She has been director of payer relations for CVS Pharmacy since 2006 and previously served in several positions with Albertsons/Sav-On Drugs. She earned a pharmacy degree from the University of Iowa, College of Pharmacy.

Mr. Law has been a board member since 2012. He has served as chief pharmacist and president at Alpha Medical Pharmacy Inc. since 1987. He earned a bachelor's degree in pharmacy from the University of Oklahoma in 1976.

at Loma Linda University School of Pharmacy and serves on the executive committee of Redlands Community Hospital and the Board of Trustees of University of Redlands.

The Lester B. Hosto Distinguished Service Award recognizes individuals whose efforts to protect the public health greatly further the goals and objectives of the NABP. The award is named in memory of former NABP President Lester E. Hosto, whose contributions to the pharmacy practice were recognized by practitioners in his state, pharmacy leaders across the nation and former U.S. President Bill Clinton.

Did You Know?

Almost six of every 10 licensed pharmacists in California are women. According to the California State Board of Pharmacy, 58 percent of the 35,526 registered pharmacists with California addresses on file are women, compared with 42 percent who are men.

California Pharmacists by Gender

Date as of 6-15-2016

The California numbers reflect a national trend. A 2014 National Pharmacist Workforce Study issued by the American Association of Colleges of Pharmacy reported that women made up 57.1 percent of actively practicing pharmacists in the United States.

In addition, female pharmacists in California are mostly younger than their male colleagues. More than half – 51 percent – of licensed female pharmacists who are California residents are between the ages of 30 and 44. Meanwhile, 53 percent of licensed male pharmacists who live in the state are 50 or older.

California Pharmacists by Age Group, by Gender

As of June 15, 2016, a total of 41,586 pharmacists were licensed by the Board of Pharmacy with active licenses. The total includes 5,947 pharmacists with addresses in other states and an additional 113 with addresses outside the United States.

Board Recognizes Registered Pharmacists For 50 Years of Service

The Board of Pharmacy pays tribute to those who have been registered California pharmacists on active status for at least 50 years. The board recognizes these individuals and gratefully acknowledges their years of contribution to the pharmacy profession. These pharmacists may take great pride in being part of such an honorable profession for so long.

Pharmacists who recently received a certificate commemorating 50 years of service and were invited to attend Board meetings to be publicly honored are:

- | | |
|--------------------------------|----------------------------|
| <i>Freeman, Lary E.</i> | <i>Incline Village, NV</i> |
| <i>Blair, William J.</i> | <i>Santa Ana, CA</i> |
| <i>Chaplain, Raymond Miles</i> | <i>San Clemente, CA</i> |
| <i>Gerome, Norman Louis</i> | <i>Calabasas, CA</i> |
| <i>Heincy, Charles Daniel</i> | <i>Granite Bay, CA</i> |
| <i>Hill, Archie Richard</i> | <i>Santa Rosa, CA</i> |
| <i>Horowitz, Kenneth N.</i> | <i>Hermosa Beach, CA</i> |
| <i>Hutchison, Loyal Dwayne</i> | <i>Stockton, CA</i> |
| <i>Lyons, Noel E.</i> | <i>Chico, CA</i> |
| <i>Mariottini, Raymond E.</i> | <i>Hollister, CA</i> |
| <i>Marotto, Ronald Raymond</i> | <i>Goleta, CA</i> |
| <i>Petroni, Frank Gary</i> | <i>Atascadero, CA</i> |
| <i>Siu, Kienki</i> | <i>Fort Jones, CA</i> |
| <i>Siu, Kingmun</i> | <i>Alameda, CA</i> |
| <i>Sudalter, Lawrence</i> | <i>Santa Clara, CA</i> |
| <i>Taj, Patricia Kawase</i> | <i>San Ramon, CA</i> |
| <i>Zingarelli, Robert N.</i> | <i>Fresno, CA</i> |

The following pharmacists were honored for being licensed for 50 years at a previous Board meeting:

Phillip E. Grauss Loyal D. Hutchison Kingman Siu

New Compounding Regulation Will Change Elements For Master Formula Documents

A master formula document is the specific recipe written by a pharmacy before it compounds a preparation. The requirements for a master formula will change on 1/1/17, pending approval of the board's compounding regulations.

Assuming the regulations are adopted, the required elements of the master formula will change and must appear in a cohesive document. As with prior regulations, the master formula must be prepared before compounding begins.

As proposed, California Code of Regulations, Title 16, section 1735.2, subsection (e), will require:

A drug preparation shall not be compounded until the pharmacy has first prepared a written master formula document that includes at least the following elements:

- (1) Active ingredients to be used.
- (2) Equipment to be used.
- (3) The maximum allowable beyond use date for the preparation, and the rationale or reference source justifying its determination.
- (4) Inactive ingredients to be used.
- (5) Specific and essential compounding steps used to prepare the drug.
- (6) Quality reviews required at

each step in preparation of the drug.

- (7) Post-compounding process or procedures required, if any.
- (8) Instructions for storage and handling of the compounded drug preparation.

Here are some examples of what you might expect the master formula document to provide for each of the above elements:

(1) Active ingredients to be used – For example, we might expect to see the active product(s), active pharmaceutical ingredient(s) (API), or active bulk substance.

(2) Equipment to be used – For example, the master formula document might reflect the hood(s), repeater pumps, scales or other equipment.

(3) The maximum allowable beyond use date (BUD) for the preparation, and the rationale or reference source justifying its determination – For example, the rationale or reference source justifying how the BUD is determined might include:

- For a compounded preparation – stability studies.
- For a compounded sterile preparation – method suitability test, container closure integrity tests, and/or stability studies and/or sterility study.

(4) Inactive ingredients to be used – For example, the master formula document might reflect the inactive product(s) or bulk substance(s) included in the preparation: for example, normal saline (NS), 5% dextrose in normal saline (D5W).

(5) Specific and essential compounding steps used to prepare the drug – For example, the master formula document might reflect a narrative of the physical processes: which ingredients, in what form, what strengths/volumes are mixed first, under what circumstances, held under what conditions for how long, in what environment, etc.

(6) Quality reviews required at each step in preparation of the drug – We might expect to see a description of each quality review in each specific and essential compounding step. For example, the master formula document might reflect that compounding staff will:

- Check that all powder is in the solution for a reconstituted product.
- Check that no powder/ liquid left the neck of the vial or ampule.
- Check for correct coloring.

Master Formula Documents

Continued from Page 9

- Check for coring of the stopper.
- Check for precipitates.
- Check for leaks.

(7) Post-compounding process or procedures required, if any – For example, the master formula document might reflect that compounding staff will:

- Place [specified ingredient or preparation] in a defined quarantine area.
- Send [X] number of samples out for sterility and endotoxin testing.
- Review of sterility and endotoxin results for satisfactory values.
- Conduct a filter integrity test on all filters used

- document PSI, compare with manufacturers allowances.

- Check for correct coloring.
- Check for coring of the stopper.
- Check for precipitates.
- Check for leaks.
- Only dispense preparation after all processes or procedures above are completed.

(8) Instructions for storage and handling of the compounded drug preparation – We would expect to see what conditions the compound drug preparations should be held under for how long. For example: protect from light, refrigerate, discard 24 hours after opened.

Have Records Ready for Compounding Inspections

Licensed sterile compounding pharmacies should have certain items immediately available for inspection by Board of Pharmacy inspectors. If any documents are electronically maintained, they must be readily retrievable by all staff and available upon request.

The board suggests that an inspection binder be created that contains the following items:

- | | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|
| 1. Most recent Self-Assessments for both the pharmacy (PHY, PHE, HSP, HPE, etc.) and each sterile compounding permit within the location (LSC, LSE, NSC, etc.) | 4. Compounding policies and procedures (P&Ps, SOPs, etc.) | documentation (certificate of analysis (CoA)) |
| 2. Most recent State Board inspections (CA and other for non-resident pharmacies, if applicable) | 5. Documentation that all new policies and procedures (or lack thereof) within the last 12 months have been reported to the Board | 11. Certificates of analysis for non-sterile components used in compounding for all ISO certified spaces |
| 3. Any FDA, DEA or accreditation inspections with applicable reports or warning letters | 6. Master Formula Documents | 12. Records of initial training for compounding staff |
| | 7. Completed recent patient-specific compounding records with associated label(s) | 13. Records of annual competencies for compounding staff |
| | 8. Compounding area semi-annual or annual (as applicable) certification reports | 14. Records of the environmental sampling conducted in the pharmacy |
| | 9. QA policies and procedures with documentation (reports) of end product testing (qualitative and quantitative analysis) | 15. Daily/Weekly/Monthly Cleaning logs |
| | 10. Non-sterile to sterile compounded product testing | 16. Temperature logs (refrigerator, freezer, incubator, etc., as applicable) |
| | | 17. Humidity and pressure logs |
| | | 18. Sample labels |

Explanation of Disciplinary Terms

Accusation Filed—an accusation is the document containing the charges and allegations of violations of the law filed when an agency is seeking to discipline a licensee.

Effective Date of Action—the date the disciplinary action goes into operation.

Revocation or Revoked—the license is revoked as a result of disciplinary action by the Board, and the licensee's right to practice or operate a Board-licensed entity is ended.

Revoked, Stayed—the license is revoked, but the revocation is postponed until the Board determines whether the licensee has failed to comply with specific probationary conditions, which may include suspension of the licensee's right to practice.

Stipulated Settlement—the board and a licensee mutually agree to settle a disciplinary case brought by the board by way of a settlement agreement.

Stayed—the revocation or suspension action is postponed, and operation or practice may continue so long as the licensee fully complies with any specified terms and conditions.

Probation—the licensee may continue to practice or operate a Board-licensed entity under specific terms and conditions for a specific period of time.

Voluntary Surrender—the licensee has agreed to surrender his or her license, and the right to practice or operate Board-licensed entity is ended. The board may agree to accept the surrender of a license through a "stipulation" or agreement.

Suspension—the licensee is prohibited from practicing or operating a Board-licensed entity for a specific period of time.

Suspension/Probation—the licensee is prohibited from practicing or operating a Board-licensed entity for a specific period of time, and the right to practice or operate is contingent upon meeting specific terms and conditions during the probationary period.

PC 23 Order Issued—the licensee is restricted from practicing or operating a Board-licensed entity by a court order that is issued under the provisions of Penal Code section 23.

Public Reprimand—resulting from a disciplinary action, the licensee is issued a letter of public reprimand.

Reinstatement of License—a previously revoked or suspended license is reinstated with or without specified terms and conditions.

Statement of Issues—a legal document that details the factual or legal basis for refusing to grant or issue a license.

Disciplinary Actions

APRIL 1, 2016 - JUNE 30, 2016

Personal Licenses

Designated Representative

Barajas, Raul J., EXC 18131,
Administrative Case AC 4577
San Diego, CA

Through a disciplinary action of the Board, the license is revoked, the revocation is stayed, and the licensee is placed on probation for 3 years, and is subject to the terms and conditions in the decision.

Decision effective 5/12/2016.

[View the decision](#)

Bartlett, Brett R., EXC 17211,
Administrative Case AC 5736
Grass Valley, CA

Through a disciplinary action of the Board, the license is revoked and canceled and the right to practice or operate has ended.

Decision effective 6/9/2016.

[View the decision](#)

Pogosyan, Khachatur, EXC 19398,
Administrative Case AC 4802
Burbank, CA

Through a disciplinary action of the Board, the license is voluntarily surrendered.

Decision effective 5/6/2016.
